NE Series – LED Signal Beacons with Capacitive Touch Buttons and IO-Link Support

Dynamic Indication, Greater Control.

[Torrance, CA – July 11, 2019] PATLITE (U.S.A.) Corporation, a leading manufacturer of innovative LED signal towers, audible alarms, and network-enabled signaling devices, announces release of the NE Series ([NE-A](#), [NE-IL](#)); seven-color, compact signal beacons with multiple I/O capabilities, for use in industrial applications.

The NE Signal Beacons features an ergonomic, capacitive touch sensor button which helps to alleviate stress on hands and wrists and makes the NE an ideal solution for pick-to-light and call light applications, in a variety of industries. These touch buttons are completely sealed, can be actuated with gloved or wet hands, and provides visual feedback upon actuation for quicker response.

Designed to provide clear, unambiguous status indication, the NE Series features ultra-bright, multi-color LEDs, continuous or flashing pattern modes, and an 88dB buzzer with high frequency tones. Constructed with a rugged, polycarbonate enclosure, the NE Series is built to withstand harsh and demanding environments, and easily install in tight spaces.

The NE-IL models feature IO-Link communications for easy integration into most industrial networks. The NE-IL can be directly connected to an IO-Link master using a single M12 cable, greatly reducing wiring and labor costs. Furthermore, non-IO-Link capable, digital or analog sensors and actuators can connect to an IO-Link network through the NE-IL's built-in inputs.

** IO-Link is a standardized IO technology (IEC 61131-9); fieldbus-neutral, point-to-point communication, universal interface that reduces installation costs and makes device replacement quick and easy. The IO-Link master monitors and collects a device's operational metrics, and can send real-time commands to signaling devices.*

ABOUT PATLITE

Since 1947, PATLITE has offered state-of-the-art equipment for the process and industrial automation industries. Innovative and robust design, backed by years of industry experience and a strong commitment to safety and security, has made PATLITE the world's best known manufacturer of visual and audible signaling products. Headquartered in Japan, PATLITE has more than 600 employees and has wholly-owned sales subsidiaries in the USA, Mexico, Germany, Singapore, Korea, Thailand, Taiwan, and China.
