Crouzet Launches New Syr-line Plug-in Timers

Compact timers are easy to configure and offer a wide range of options

ALLEN, Texas, January 14, 2019 -- Crouzet, a global supplier of automation and motion control solutions, has released a new line of timers designed to suit a wide range of applications across many industries. The Syr-line Plug-in timers offer end users easy operation and extra features for convenience.

A new compact range for a better user experience

Measuring just 1.38" x 1.78", Syr-line Plug-in timers **save space**. The Syr-line range of products has **eight options**: four 8-pin timers and four 11-pin timers. Customers can choose from timers with **on-delay, off-delay, repeat cycle, or a multifunction option** for **added flexibility**.

"With a compact size and wide time range available on all eight timers, the new Plug-in timers offer a real comfort to their users," said Hugo Neri, Automation and Control Product Manager. "Less space is needed in the panel, and it is very easy to configure any of the products in a few seconds."

Syr-line Plug-in timers' design includes an orange dial that's easy to see and set. They can also be hand-operated, while it's also possible to use a screwdriver to adjust the settings. The timers also come with a **protective cover** than can be locked for added security.

A wide time range and universal power supply capabilities: a winning combination

Additional features include a wide time range that allows users to **set delays between 0.5 seconds and 10 days**. Syr-line Plug-in timers also feature **universal input power capability**, which allows them to be used in systems with a 12V DC power supply, a 120V AC power line, or even a 240V AC power line. This flexibility can **save businesses time and money** because there is no need to reconfigure equipment based on variation in input

voltage.

The solution to a large range of applications

Syr-line Plug-in timers are useful in a **wide range of applications, from railway crossings, access doors, commercial ovens, drink dispensers, and more.** "The compact design and high performance enable us to recommend the new Plug-in timers for HVAC systems where it can secure motor inrush current, and food and beverage or industrial dispensers where dosing is at stake," said Neri.

Syr-line Plug-in timers are cULus- and CE-certified.

About CROUZET

Since 1921, Crouzet has been committed to designing, manufacturing and supplying efficient components for automated systems to serve a wide range of applications in the Aerospace & Defense market and in many Industrial equipment markets with a specific focus on applications such as Access control, Railway, Nuclear and Industrial valves markets.

Crouzet's product lines include Automation and Control devices, Motion products, Switches and Position Sensors, Cockpit Controls and Electrical Protection Solutions.

Crouzet has a heritage of close collaboration with customers in the development of adapted products to fully customized solutions.

Driven by innovation and customer satisfaction, our teams are focused on delivering the right products and services for the right application, always meeting, and often exceeding customers' expectations.

Crouzet is your trusted partner of choice to face industrial challenges of today and tomorrow.

Crouzet is a company of InnoVista Sensors™.
