FOR IMMEDIATE RELEASE

THE KNOTTS COMPANY OFFERS AUTOGUIDE MOBILE ROBOTS

Introducing AutoGuide Products to a Growing Warehouse Automation Market

BERKELEY HEIGHTS, NJ (December 2, 2019) — The Knotts Company, provider of automation solutions, has expanded its product line by providing AutoGuide products to the area's growing automation and material handling markets. AutoGuide designs, develops and manufactures high-payload industrial autonomous mobile robots. Among the AutoGuide products offered by Knotts is the Max N10 Tugger and the Max N10 Pallet Stacker.

"We're eager to introduce AutoGuide to customers seeking higher payload requirements to automate their material handling and logistics," said Rick Howe, President of Knotts. "The logistics and warehouse automation market is strong and growing in New Jersey. We're pleased to help meet the needs of our current and future customers by providing reliable, robust, and cost-saving AutoGuide robots."

In a recent case study, a tier 1 automotive manufacturer with 65 plants piloted the Max N10 Tugger at their Advanced Manufacturing Engineering (AME) facility. When compared to a competitor, the Max N10 Tugger had the strongest ROI, flexibility in project scope and willingness to adjust accordingly and met national safety standards while exceeding ANSI B56 specifications. Following the successful pilot phase, the company's AME group installed numerous Max N10 Tuggers at the test site and invested in additional Max N10 Tuggers and Max N10 Pallet Stackers for some of their other sites.

About AutoGuide Mobile Robots

AutoGuide Mobile Robots designs, develops and manufactures high-payload industrial autonomous mobile robots for assembly, manufacturing, warehousing and distribution operations across multiple industries. AutoGuide's Max N10 modular mobile robot platform is the industry's most reliable and affordable natural feature guidance platform with a growing number of application-specific configurations available, including tugger, conveyor deck, car mover and pallet stacker. AutoGuide has a mobile robot R&D center located in Chelmsford, MA and a manufacturing facility in Georgetown, KY. AutoGuide was recently acquired by Teradyne.
