Welcome Glenn Benner

Data Panel's New President

Suwanee, Georgia, July 17, 2020 – Murrelektronik and Data Panel are pleased to announce the appointment of Data Panel's new President, Glenn Benner. Data Panel is a small company on a fast track to immense growth, and Glenn's expertise in engineering and production will realize this growth.

Glenn, a Pennsylvania native, graduated from Penn State University with a degree in mechanical engineering. Since then, he has held a number of engineering and management positions in the mobile equipment industry, including a nine-year stint with Donaldson in various positions of leadership. As the new President of Data Panel, he is excited for the opportunity to grow the organization globally.

Data Panel was founded upon the need for excellent innovation, and since then has developed a vast product range and strong relationships with loyal customers. Glenn's focus on improving the efficiency of product development and production, as well as teambuilding and employee development, will make the quality of Data Panel products a global standard for the mobile vehicles market.
