SMAC Moving Coil Actuators Factory Tour Offer During the AHTD Spring Meeting

SMAC Moving Coil Actuators will be offering factory tours the entire week of the Spring AHTD Meeting, Monday, April 23, 2018, through to Friday, April 28, 2018, between the hours of 9am to 2pm. Tours last approximately one hour and visitors will have the opportunity to meet SMAC President, Edward Neff. SMAC is located a half-hour's drive north of Coronado at 5807 Van Allen Way, Carlsbad, California, 92008. To schedule your tour, please call 760-929-7575.

SMAC Moving Coil Actuators are all-electric, manufactured in California, and are used by many of the most prominent names in consumer electronics. They are found globally in the packaging, electronics, automotive, cosmetics, food, bio, medical, pharma and general manufacturing industries.

SMAC's built in sensor feedback system gives SMAC's Moving Coil Actuators the unique mechatronic ability to "do work and verify its success at the same time." This would allow the actuators to quality check key processes 100% in real time and feedback the results.

SMAC Moving Coil Actuators are true "mechatronic solutions." By that they mean their actuators have unique capabilities such as programmable and controllable position, velocity, and force, high accelerations, cycle life well over 100M, and a patent-pending "Soft-Land" capability. The Soft-Land capability is particularly useful when performing fragile part assembly, measurement, moving objects, etc.
