

## ANNOUNCING LEUZE'S NEWEST PARTNER, CORNERSTONE TECHNICAL GROUP

**NEW HUDSON, MI (March 18, 2020)** — Cornerstone Technical Group, provider of automation solutions, has partnered with Leuze to offer an extensive line of sensors and corresponding accessories for industrial automation in six different product areas. The German-based company is an expert in innovative and efficient sensor solutions for industrial automation.

With 20 years of experience, Cornerstone Technical Group excels at guiding customers through the entire process from initial stages of information gathering and system conceptualization, through product selection to post-sale training and implementation.

Leuze—the Sensor People—offers products ranging from switching and measuring sensors, identification systems, data transmission and image processing solutions, and machine safety components and systems. With industry specific solutions for intralogistics, packaging, machine tools, electronics, automotive, and laboratory automation.

The combination of Cornerstone Technical Groups solution-based application approach and Leuze's industry specific solutions, will make for a great partnership.

### About Leuze

*Yesterday. Today. Tomorrow.*

With curiosity and determination, the Sensor People from Leuze have been innovators of technological milestones in industrial automation for more than 50 years. They are driven by the success of their customers. Leuze was founded in 1963, headquartered in Owen/Teck in Southern Germany.
