

NOSHOK Announces Acquisition of King Engineering, Inc.

Berea, Ohio (December 6, 2019) NOSHOK, Inc. is pleased to announce the acquisition of King Engineering, Inc., including KING-GAGE and KING Filters. This acquisition supports the strategic expansion of NOSHOK's Level Measurement Solutions portfolio and strengthens NOSHOK's presence in the food, beverage, dairy and marine markets. The brand will be renamed King Engineering, Inc. A NOSHOK Company.

King Engineering, Inc, an established and respected global supplier to the food & beverage industry for over 80 years, specializes in the design and manufacture of liquid level tank gauging equipment and compressed air filtration components. King Engineering, Inc. products also address the chemical, industrial, offshore, marine and water/wastewater markets.

"We view the addition of KING-GAGE products to our portfolio as a seamless extension to our current Measurement Solutions offering," said Jeff Scott, President of NOSHOK, Inc. "With NOSHOK's strong sales, marketing, engineering and product development resources, and world-class customer support now powering the KING-GAGE brand, we look forward to continued growth and expansion in the food, beverage, dairy and marine markets."
