

New Syr-line Digital Timer Relays

Crouzet expands its extensive machine control product line with the new compact, powerful, and highly visible Syrline family of digital timers. Available in 8-pin and 11-pin configurations, with plug-in, DIN rail, screw terminal, or solder plug mounting styles, the 1/16 DIN (48mm x 48mm) front face has the biggest viewing screen in its class with highly visible ½" (13.2mm) digits.

Available in a standard version with LCD screen (Essential version) and a higher performance version with an OLED screen (Performance version), the family consists of six (6) part numbers that provide low-voltage input from 24V AC/DC up to line input voltage of 240V AC. Essential and Performance versions are competitively priced and offer the possibility of up to 62 programming functions in a single timer.

The Performance version is designed to be viewed from a distance from a wide-range of viewing angles, whether indoor or outdoor, and is ideal for use in industrial process control systems to control the timing of motors, pumps, compressors, conveyors and handling equipment, packaging, alarms, and dispensing machines. OEMs that incorporate the digital timer in industrial, commercial, food and beverage, or industrial equipment not only benefit from its compact 63mm length and dual-output option, OEMs also add value to their end users' experience by incorporating a precision timer that is easy to program (with or without gloves) that can withstand a range of conditions due to the timer's IP66 rating.

Programming functions required for most applications are standard, along with advanced programming features not offered in similar product. The new Syrline digital timer series has the ability to retain a program in memory, lock a program with password protection, provide maximum pre-set time limits, and control single or dual loads up to 2 X 10A.

Many of Crouzet's authorized distributors offer same-day shipment from stock; visit Crouzet.com and enter the part number you need and click "Distributor Stock" to locate available inventory.

About Crouzet

Since 1921, Crouzet has been committed to designing, manufacturing and supplying efficient components for automated systems to serve a wide range of applications in the **Aerospace & Defense** market and in many Industrial equipment markets with a specific focus on applications such as **Access control, Railway, Nuclear** and **Industrial valves** markets.

Crouzet's product lines include **Automation and Control** devices, **Motion** products, **Switches** and **Position Sensors, Cockpit Controls** and **Electrical Protection Solutions**.

Crouzet has a heritage of close collaboration with customers in the development of adapted products to fully customized solutions.

Driven by **innovation** and **customer satisfaction**, our teams are focused on delivering the right products and services for the right application, always meeting, often exceeding customers' expectations.

Crouzet is your trusted partner of choice to face industrial challenges of today and tomorrow.

Crouzet is a company of [InnoVista Sensors™](#).
