

FOR IMMEDIATE RELEASE:

Three-Phase Monitoring Relays with a Wider Input Voltage Range

THREE-PHASE MONITORS with a Wider Input Voltage Range

October 30, 2019 - Buffalo Grove, IL - CARLO GAVAZZI is proud to announce the launch of several new **Three-Phase Monitoring Relays which feature a Wider Input Voltage Range**. These new models, part of the **DPB** and **DPC** families, are ideal for distributors and customers as they reduce the number of individual items that need to be stocked, while providing unsurpassed quality and functionality.

The new **DPB** and **DPC** models feature an upgraded switch mode power supply, which provides a wider input voltage range to cover different mains voltages, while reducing heat dissipation and improving reliability and stability. The **DPB** series has an input voltage range of 208 VAC to 480 VAC, while the **DPC** series has an input voltage range of 208 VAC to 690 VAC. All of the new models feature an expansive frequency range of 50 Hz to 400 Hz, making them ideal for a wide range of applications.

Three phase monitoring relays are ideal for protecting motors from severe damage that can result from loss of a phase, phase imbalance, or phase reversal. Motors can be found in a wide range of applications, including: HVAC systems, water treatment, material handling, machine tool, marine and aviation.

Key features of the **DPB** and **DPC Three Phase Monitoring Relays** include:

- Noise, harmonics, and transient filtering
- Significant reduction in power consumption versus previous models
- Wide input voltage and frequency range
- Voltage ranges selectable by DIP switches
- DIN Rail mounting
- Plug-in option available for DPB series

The **DPB and DPC Series of Three Phase Monitoring Relays with wide input range** are available from Carlo Gavazzi's network of sales offices and distributors in the Americas, or at www.GavazziOnline.com.
