

## DieQua's Refreshed Website

A new year brings about a feeling of refreshment – and for DieQua Corporation, that is no different!

DieQua's [website](#) has now been updated – starting in September 2017, we started to make changes to the look and feel of the website to better assist you. These new features include blog articles on helpful tips, industry and company news; a comprehensive contact us page and more.

Take a look at our new, streamlined product pages, where each product image now contains an interactive feature of a 360-spin to see all angles. Register for product catalogs so that we can better understand your application needs. In addition, the updated site is more mobile-friendly.

DieQua Corporation is a manufacturer and supplier of a wide range of motion control and power transmission drive components. Our focus has always been to provide products that offer the highest quality, the most unique designs, and the most reliable performance, along with superior value.

Not resting on our past accomplishments, DieQua continues to search the world over for innovative products to meet the changing technological needs of the industries we serve.
