**Indianapolis, IN: Allied Automation, Inc.** announced today that they have opened their new Universal Robots Certified Training Center with courses scheduling now through the end of 2020.

[Click here for detailed information.](#)

“Our Certified Universal Robot Training program is an important addition to our Advanced Manufacturing Automation Training Center in Indianapolis and our extensions in Dayton, Ohio and Louisville, Kentucky. This reflects Allied Automation’s commitment to keeping manufacturing local for the benefit of our local communities by helping manufacturers migrate efficiently and cost effectively toward leading edge manufacturing technologies, product upgrades and intelligent solutions” said Greg Dill, President of Allied Automation. “Through our products and application knowledge and our advanced design team consulting and training, manufacturers can quickly acquire and sustain enhancements in performance, reliability and information connectivity that are critical to an advanced and lean production environment.”

Allied Automation offers the following Universal Robots training courses: UR Basic Skills Training, UR Certified Core and UR Certified Advanced. [Click here to schedule your training course.](#)
