Construction Begins Soon in Rose Garden Lane

for Sierra Verde Well Pipeline Installation

The city of Glendale's contractor, MGC Contractors, continues to work at the Sierra Verde Well to outfit the well to bring it into full operation as part of Glendale's water distribution system to serve its residents and businesses. As part of this effort, crews will install pipeline along the south side of Rose Garden Ln, from 75th Ave to the well site at Sierra Verde Park.

Crews will begin work on Monday, June 1, during the school's summer break to trench and install pipeline in Rose Garden Ln, beginning at the 75th Ave intersection and moving east toward 71st Ave, with completion in early August.

During work at the 75th Ave intersection, lane and turn restrictions will be in place to shift traffic away from the work zone.

As the work moves east on the south side of Rose Garden Ln, **Rose Garden Ln will be reduced to one lane of traffic, WESTBOUND only, with no eastbound traffic permitted between 75th and 71st avenues.** There will be no access to/from 74th Ave on the south side of Rose Garden Ln or the school parking lot on Rose Garden Ln. Detour signage will be in place to direct travelers.

Work will take place daytime hours, weekdays, beginning as early as 5 a.m., with traffic control remaining in place 24/7 to protect the work zone and for the safety of the traveling public. Access will be maintained to residences, the park, and the school, although it may not be the most direct route.

Thank you for your patience during this important work.
