

Magnolia Morelli

Magnolia Morelli is an undergraduate student at Utah Valley University, where she works with Dr. Geoffrey Zahn. Magnolia is currently in school to obtain a bachelor's degree in Biology. She is working on a multiple-part study of mycophagy in ungulates and other mammal groups such as monkeys. Her first paper was recently published with Dr. Carl Hjelmen and Dr. Heath Blackmon, a database providing insights into Diptera and Drosophila karyotypes. Her future goals include entering a Ph.D. program centered around mycology, working as a professor at a University, and continuing to study the movement, dispersal, and evolution of fungal colonies.
