

## Jeff Stallman

Jeff is a PhD student in Mary Catherine Aime's laboratory at Purdue University where he studies the taxonomy and systematics of the class Leotiomycetes. He received his MS at the University of Hawai‘i at Hilo working on the biodiversity of light-spored Agaricaceae on Hawai‘i Island. He is interested in fungal taxonomy, conservation, biogeography and community science, and cofounded the Hawai‘i Fungi Project to promote community science in mycology. Beyond mycology, he enjoys tennis, swimming, frisbee, hiking, and playing board, card, and word games.
