

Fabiola Pulido-Chavez

Fabiola Pulido-Chavez graduated from the California State University-Fresno in 2015 with a BS in Environmental Science. In 2018, she received her Master's degree in Forest Ecology from the University of Washington, where she worked to understand the effect of high-severity wildfire on the ectomycorrhizal and saprobic fungal communities of Ponderosa pine. Currently, Fabiola is working as a Ph.D. candidate in Dr. Sydney I. Glassman's Lab at the University of California-Riverside, where her research is focused on understanding fungal and bacterial secondary succession, resilience, and functional dynamics after chaparral wildfires.
