

Aquatic Animal Drug Approval Partnership Program - AADAP Update

The AADAP Update provides recent news and updates from the Aquatic Animal Drug Approval Partnership Program and its partners. For questions or to offer feedback, email Jim.Bowker@fws.gov.

We are looking for presenters for the 23rd Annual Aquaculture Drug Approval Coordination Workshop, held in Bozeman Montana August 1-3, 2017. Typically, presentations focus on the research conducted to support fish drug approvals. This year, we'd like to enhance the technical portion of the workshop by including presentations on how fisheries folks are successfully using one or more fish drugs on fish, either in the hatchery or in the wild. We think it's important to showcase how different programs are using fish drugs to meet their fisheries management goals. If you are currently using a fish drug that enables you to meet a fisheries management objective, we'd like to hear from you. Please contact the [AADAP staff](#) if you are interested in presenting or for more information. It's a great time to visit Southwest Montana which is not a long drive from Yellowstone National Park.
