Services Program

Coronavirus Economic Relief for Transportation Services Program

The Coronavirus Economic Relief for Transportation Services (CERTS) Program is providing eligible transportation service companies with resources to help to maintain payroll, hire back employees who may have been laid off, and cover applicable overhead and operational expenses.

Established by the Consolidated Appropriations Act, 2021, the Coronavirus Economic Relief for Transportation Services (CERTS) Program was created to support transportation service providers affected by the COVID-19 pandemic, including motorcoach, school bus, passenger vessel, and pilot vessel companies.

Under the program, Treasury will provide up to \$2 billion in grants to eligible companies that certify they have experienced an annual revenue loss of 25 percent or more as a direct or indirect result of COVID-19. CERTS grant funds are primarily to cover payroll costs, but may also be used to cover the acquisition of services, equipment, including PPE and protection measures from COVID-19 for workers and customers; continued operations and maintenance of existing equipment and facilities; rent, leases, insurance, and interest on regular debt service.

PROGRAM INFORMATION AND APPLICATION PROCEDURES

Treasury will post program guidelines, applications procedures, and other materials on this website, and open the CERTS application portal to begin accepting applications in the future. Please check this site regularly for updates.

<https://home.treasury.gov/policy-issues/cares/preserving-jobs-for-american-industry/certs>

CERTS Act

Have your income statements ready (2019 and 2020).

Payroll information (2019 and 2020).

Total of any previous aid (PPP, EIDL, MSLP, grants, etc.)

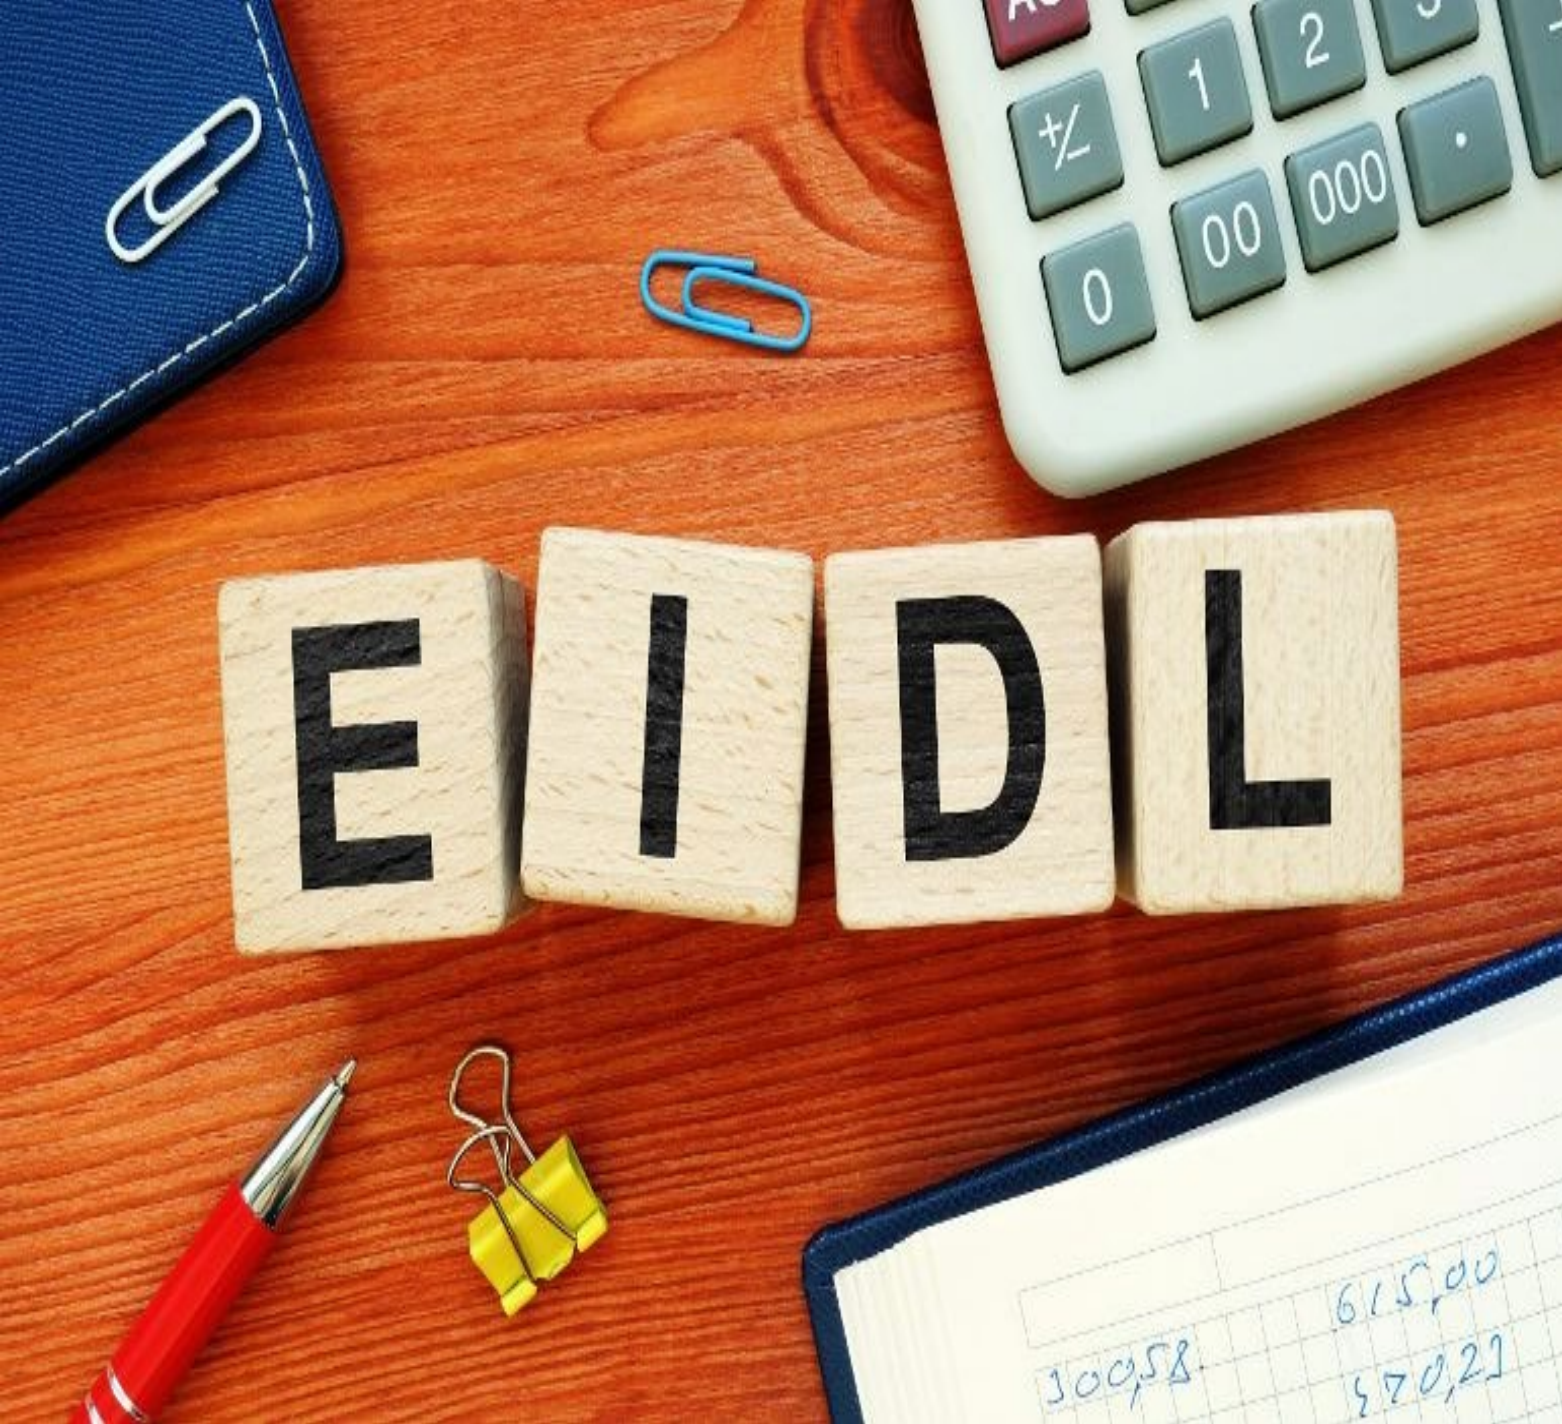

SBA Paycheck Protection Program

Extending the filing deadline for submitting applications by 60 days.

Additional 30 days to process applications submitted by May 31.

Approximately \$79 billion remains.

190,000 pending applications.

Economic Injury Disaster Loan

24-months of economic injury with a maximum loan amount of \$500,000.

SBA will reach out directly via email and provide more details about how businesses can request an increase

April 6th

SBA deferring periods for all disaster loans, including COVID-19 EIDLs, until 2022

Infrastructure bill

Surface Transportation reauthorization bill

President Biden Proposal: American Jobs Plan

\$2.3 trillion over 10 years paid for with 15 years of corporate tax increases

\$932 billion total spending for infrastructure

\$571 billion for transportation (on TOP of assumption of separate FAST Act reauthorization at current funding levels for highways, transit and rail) :

- \$115 billion for roads, highways, and bridges**
- \$20 billion for road safety**
- \$85 billion for public transit**
- \$80 billion for Amtrak and freight rail service**
- \$160 billion plus \$14 billion in tax incentives for electrification of transit, school bus and federal fleets plus charging infrastructure**
- \$25 billion for airports**

Biden Infrastructure Proposal - continued

- **\$17 billion – inland waterways, ports and public ferries**
- **\$25 billion – new program to address historic inequities/racial equity/environmental justice**
- **\$44 billion – projects of regional and national significance**
- **\$361 billion – non-transportation infrastructure:**
 - \$111 billion – drinking water and wastewater**
 - \$100 billion – broadband**
 - \$100 billion – cleaner power**
 - \$50 billion – resiliency upgrades to all**

Biden Infrastructure Proposal (continued)

- **\$1.3 trillion Other Investments:**
- **\$360 billion – construction and renovation for affordable housing, public schools, community colleges, child care facilities and VA hospitals**
 - \$180 billion – research and development**
 - \$300 billion – manufacturing and small business**
 - \$100 billion – workforce development**
 - \$400 billion – community caregiver jobs**

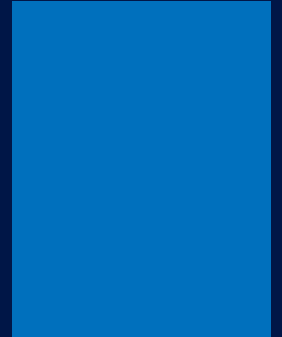

Motorcoach – Tire and Weight Issues

April 1, 2021

UMA Town Hall

U.S. Department of Transportation
Federal Motor Carrier Safety Administration

2012 Litchfield IL. Motorcoach Accident

Left Steer Tire

2012 Litchfield IL. Motorcoach Accident Right Steer Tire

Motorcoach Safety Advisory Bulletin

August 2012

Result of Summer motorcoach tire incidents

- Extreme summer heat
 - Pavement temperatures 50-90 F hotter
- Tire pressure maintenance issues
- Heavy passenger/cargo loads
- Leads to potential violation of tire load carrying capacity

Advisory Informs industry of FMCSA concerns

*** Re-issued Alert in July 2013***

Tires are put together with heat and pressure and they will come apart the same way.

Air is what carries the load

Motorcoach

Tire spec

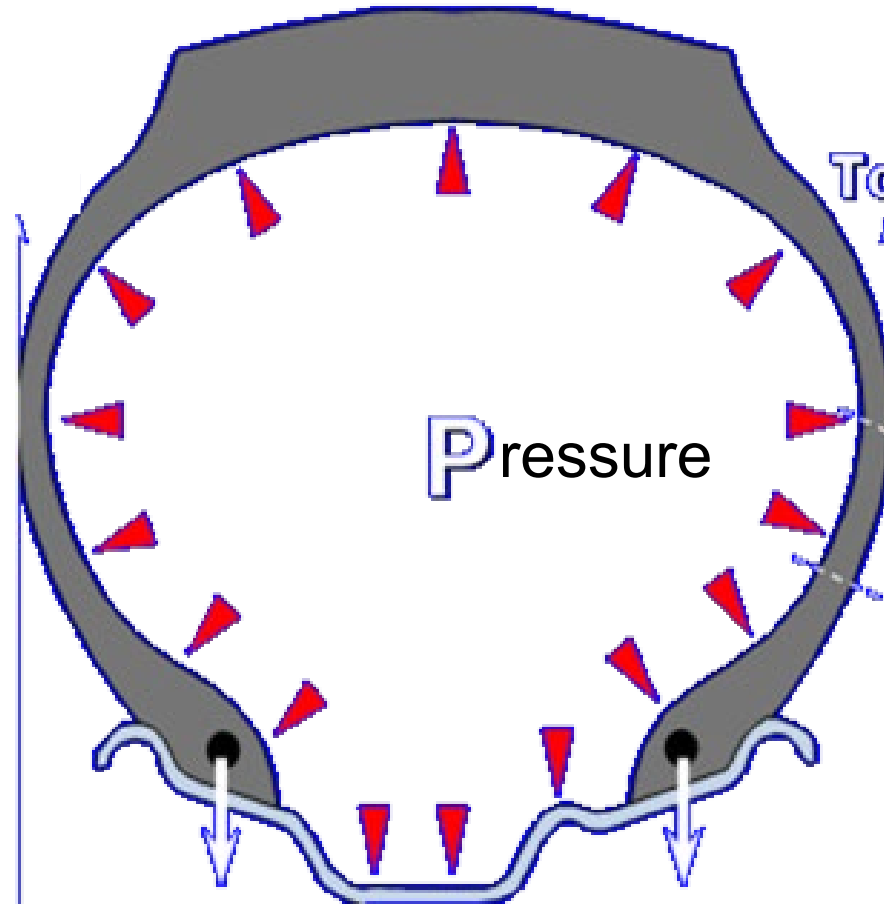

130 psi

**Typical
truck tire
spec**

100 PSI

**Typical car
tire spec**

35 PSI

**Tire air
pressure
specification
based on
worst case
load
scenario**

Air Pressure & Temperature

- Bus & Truck Tires
 - Every 10 F = 2 PSI
 - At 70 F, Tire Pressure = 100 PSI
 - At 20 F, Tire Pressure = 90 PSI

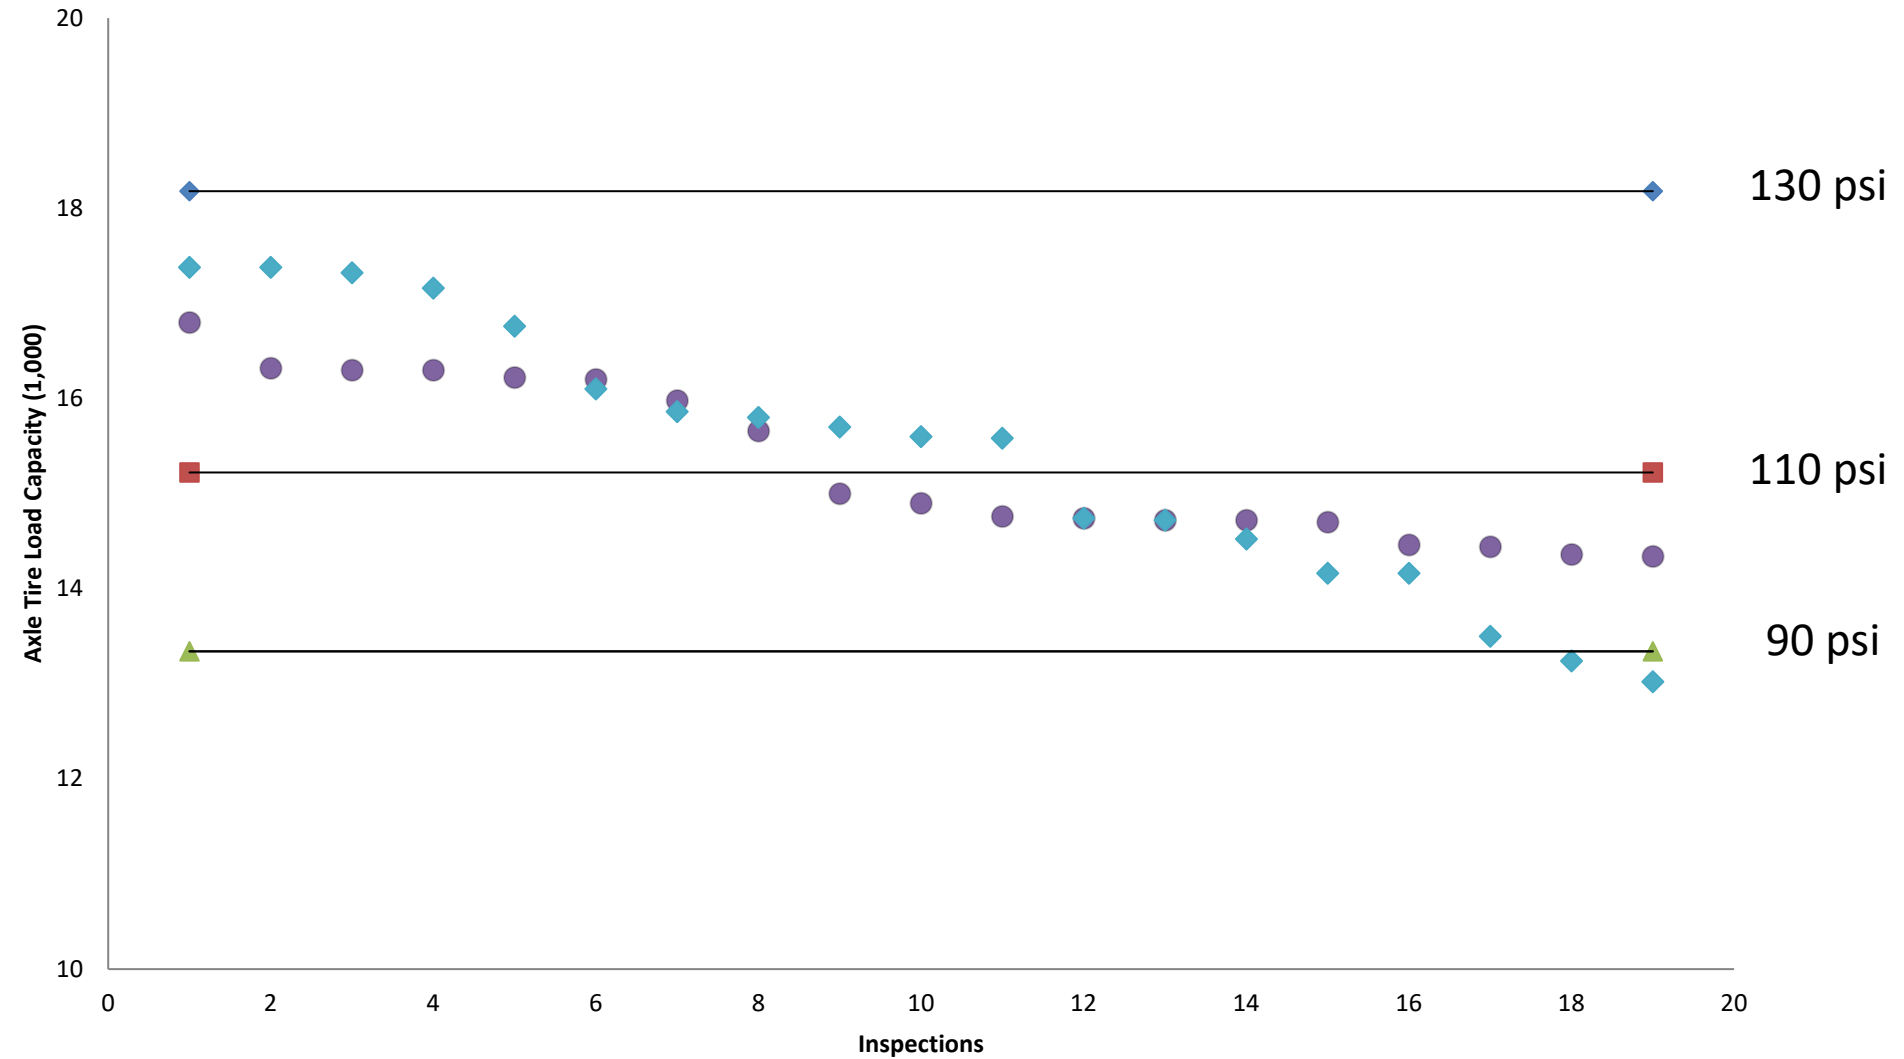

Air Pressure & Speed

- Hotter the tire, the higher the air pressure
 - Steady State
- Truck Tire Example:
 - 100 PSI at 70 F
 - After Driving 65 mph for 20 minutes
 - 115 PSI (at 70 F)
 - After Driving 70 mph for 20 minutes
 - 120 PSI (at 70 F)

Motorcoach Strike Force (September 2012)

- Several states weighed passenger loaded motorcoaches
- Tire load carrying capacity issues
 - Minimal safety margin, some axles overloaded
 - Steer axle worst offender
 - Even with less than full passenger load
 - Both single deck and double deck affected
 - Steer and tag axle most significant concern

Motorcoach Steer Axle

49 CFR 567 – and creates a “design” problem

- Defines “Gross Vehicle Weight Rating” or “GVWR” followed by the appropriate value in pounds, which shall not be less than the sum of the unloaded vehicle weight, rated cargo load, and 150 pounds times the number of the vehicle's designated seating positions.

Tires

- Tire Capacity
- Tires need to be designed into the motorcoach
- Work with manufacturers to build what you need.
- 49 CFR 567 GVWR – 150# per passenger
 - Minimum acceptable
 - Not realistic

Why Do Tires Lose Air?

- Osmosis through the tire casing
 - (1-4 psi per month) depends on various factors
- Tread Punctures
- Sidewall damage
- Leaking valve stems (* Note should use good quality O-ring style caps)

Most Common tire Pressure Gauge

Stick style Gauge

- Not very good
- +/- 3 percent is the magic number when the gauge is brand new
- Drop it a few times and the gauge accuracy drops significantly
- Temperature affects accuracy
 - Metal spring property changes (spring constant)

Are Digital or Dial-Type More Accurate vs Stick Gauges?

- Heavy duty dial tire pressure gauge with hose
- Dial: 2"
- Steel case and ring, acrylic window, heavy duty zinc alloy dual chuck, pressure holding-bleeding button, flexible hose
- Range: 0-60psi, 0-75psi, 0-100psi, available for bar, kg/cm², kpa etc
- **Accuracy: ANSI B40.1 Grade B**
- Rubber gauge protector for option

(DON'T RELY ON HARBOR FREIGHT QUALITY GAUGES)

Pressure Gauge Accuracy

- How do many tire dealers & fleets check for pressure gauge accuracy?
 - Comparative gauge test
 - 3 gauges checked against each other, if 2 are close and the 3rd is different, throw the 3rd gauge away
 - Check versus a master gauge

Tire Pressure Monitoring Systems (TPMS)

- Do you have it?
- Warning set points?
- Does warning tolerance put vehicle over load capacity?
- What do you do with data – telematics?
- Documenting “saves” “alerts” “resolution”

How do you determine what it does for you?

Previous FMCSA Tire Pressure Monitoring System (TPMS) work

- FMCSA (MC-PSV) has conducted research on tire pressure monitoring systems (3)
- Motorcoach and tractor – semitrailer
- Systems (can?)work well, accurate to 2-3 psi
- A bunch of vendors
- Systems have supposedly gotten much better

Other passenger carrier tire issues -

- Shuttle buses
- Mini-buses
- Lots of passengers
 - Tire appropriately

Recommendations for Industry

- Tire Management (plan)
- Pressure management, tread depth management, alignment/toe issues
- Don't wait for regulation
- Lead by example.
- If you don't fix it, we'll be pressured to regulate it.
- Safety is "our only business"

FMCSA Challenges you:

- Carriers – evaluate your tire maintenance program
- Motorcoach Mfrs – work with tire mfrs to develop adequate tires
- Tire mfrs – “help” the carriers develop good tire maintenance programs
 - As simple as wall charts and tire pressure gauges
 - As complex as TPMS, telematics
 - Identify who is responsible for checking
 - Oversight

Tire Information Label

 **PREVOST®** 06

MANUFACTURED BY : PREVOST CAR INC.
FABRIQUE PAR : STE - CLAIRE, QUE.

DATE OF MFG. : 11/05
DATE DE FAB.

N°

42646

VAN HOOL PROVIDES THE ADDITIONAL TIRE INFLATION PRESSURE LABEL

So.....what's changed in last 5 years

- Tires better
 - 315 80R 22.5 mfr tires have been uprated from 9090 lbs at 130 psi
 - More use of 365 70 R 22.5 tires on front steer axle
- TPMS better ?
- Telematics - TPMS
- Post Covid Concerns
 - Reduction in “trained” personnel
 - Loss of maintenance personnel
 - Re-evaluate tire management plan before really get rolling again
- GOALS – Zero is the goal!

Add Employee Members

All employees of UMA Member Companies are eligible for member benefits. To add employees:

- Login to your Member Profile
- Click Membership at the top
- Scroll down to Members
- Click Add Member
- Enter their information
- Click Confirm

The employee will receive an email with information to login to their account.

The screenshot shows the UMA Member Profile page. At the top, there is a navigation bar with the UMA logo and three tabs: MEMBERSHIP, MY EVENTS, and TRANSACTIONS. The MEMBERSHIP tab is highlighted with a red circle. Below the navigation bar, the MEMBERSHIP section is expanded, showing a list of membership details: Membership, Vendor (Active), Membership end (March 01 2022), Balance (0.00), # of events attended (0), Last event attended (None), and Upload waiver form / document (Choose File, No file chosen). Below this list is a blue button labeled RENEW MEMBERSHIP. Below the MEMBERSHIP section is a collapsed section labeled UPDATE CREDIT CARD. At the bottom, the MEMBERS section is expanded, showing a table with columns: Name, Email, Phone #, Title, and Membership end. The table is currently empty, with a message "No data available" at the bottom right. A red circle highlights the MEMBERS section header.

Name	Email	Phone #	Title	Membership end
