

**IDEAL PRECISION**  
INSTRUMENT SERVICE, INC.

# Your Single Source for Precision Instruments, Gaging, and Repair

## UNDERSTANDING OUR ABILITIES

Ideal Precision Instrument Service uses old world craftsmanship along with 100% factory replacement parts to provide the highest quality repairs possible. All repairs are inspected to conform to factory or Federal specifications. Our large inventory of factory replacement parts allows us to have a normal turn around time of 10 to 12 working days. Our repair charges will not exceed 30-40% of the cost of a new tool without prior approval. We will advise you of the repair cost for any tool that is excessively worn, or severely damaged. If a tool is deemed uneconomical to repair due to age or severity of damage, an additional credit may be issued towards a replacement tool.

**We are an ISO 9001: 2015 certified facility using N.I.S.T. traceable masters to verify all repairs and preform all calibrations.**

Registration # 6405-01
