

# **Site Planning Committee**

Input from congregation:

## **Safety**

## **Topography/drainage**

1. Stabilize slope, possibly with retaining wall, on south side of property
2. Remove trees along ditch that separates the corner property from the original property
3. Terrace area that connects the old property to the corner lot

## **Parking**

1. Add parking to the corner lot
2. Add parking to the south of the current entrance of the parking lot (currently dirt lot)
3. Expand parking to the east (see #4 under Beauty)

## **Beauty**

1. Add fruit trees and an easy maintenance garden to the corner lot; the trees/garden could provide extra fresh food to families in need
2. Put a labyrinth over the leach field behind lower Whitaker Hall
3. Put a labyrinth on the corner property with a walking path that goes from the labyrinth around the property and back again
4. Move water tanks and garbage further eastward and expand parking in that area

## **Community Welcome**

1. Add kids' play structure in area behind lower Whitaker Hall – consider rope swings, double swings, and standard one-person swings
2. Make corner lot welcoming and usable for community

## **Other**

1. Expand Whitaker Hall to the west – this is the direction that has the most potential, so we should avoid making changes to that part of the property that could prevent such expansion in the future

2. Expand Whitaker Hall to the south (this might be problematic since there's a leach field in that general area)
3. Expand the shed
