

OVERVIEW

ALERT: PEPPERS, CAULIFLOWER, CORN, CUCUMBERS, GREEN ONIONS, LIMES

Florida and Mexico are limiting pepper and tomato supplies. Freeze damage in Florida and extreme heat in Mexico are reducing yields and quality, keeping markets elevated. Bell peppers, especially reds, are tight, with mixed quality and limited premium packs. Tomatoes face similar pressure, with rounds, romas, and grape/cherry tight. Relief is gradual—Sonora, California, and Georgia will ramp later, but tight supply and high prices continue through mid- to late April.

TRANSPORTATION:

Active freight markets this week with fuel increases nationwide are settling in.

WEATHER:

Florida: Isolated showers Tuesday-Saturday; mostly dry and warm. Winds 20mph. Highs 80s, lows 50s-70s.

California: A low-pressure system brings slight rain through Thursday. Lows upper 30s to mid-50s, highs low 60s to low 70s. Clear Thursday night; lows 30s-50s. High pressure Saturday warms highs 60s-80s coast, 80s inland.

Arizona: Highs upper 70s-mid 80s Wednesday, warming to low-mid 90s by weekend. Lows 60s-50s, rising to 60s Saturday. Winds 20-30mph, easing Sunday.

Mexico: Isolated showers Tuesday, tapering through Saturday. Highs mid-60s to mid-85s, lows mid 40s to mid-50s.

FRUITS AND VEGETABLES

Avocados: Markets remain steady at lower levels, supported by ample on-tree supply and consistent demand. Peak sizing is 48 count, with dry matter and oil content in the low 30s, resulting in excellent eating quality. We'll provide updates if anything changes on the avocado front.

Pineapples: **ESCALATED** Supplies are tightening as demand rises ahead of Easter, putting pressure on the market. Availability of 6/7 count crowned fruit is very limited, with improvement expected in 2-4 weeks. Overall supply is slightly lower than previous weeks, making it challenging to meet Easter volumes. Contracts remain the priority. Crownless 8 and 10 count fruit are tight, and organic pineapples continue to be limited. Bunker fuel costs will be a key factor for Q2 pricing.

Grapes: Green grape supplies are tighter on both coasts, with slightly higher prices as Peru finishes and Chile offers lighter volume. Current supply meets demand, but tightening is expected later in the month. Red grapes remain in good supply, with the market slightly higher.

Bananas: Banana supply remains stable despite strong demand for school business rapidly ramping up. Overall, banana quality has been very good.

Apples: The market is holding steady to slightly higher as supplies continue to tighten. Retail bag programs are absorbing a significant share of smaller fruit, pushing foodservice buyers to get creative with sizing to meet their needs. Smaller sizes, 100 count and below, are especially limited in Cosmic Crisp, Honeycrisp, Pink Lady, and Gala varieties. This trend is expected to persist until the new crop becomes available.

Pears: The market is gradually firming. Bartlett shipments are mostly finished, easing pressure on Anjou pears. Red pears are adequately supplied, and Bosc pears remain plentiful.

Blueberries: **ESCALATED** The industry continues to face shortages of this item from Mexico, Peru, and California. California production is expected to grow week over week heading into late April, while the PNW crop should begin in 4-6 weeks, weather permitting.

Raspberries: **ESCALATED** Supplies remain light from CEMEX and Baja, keeping markets elevated as demand outpaces supply. Some quality issues are still being reported.

Strawberries: Above-normal temperatures are causing heat-related issues in the fields, impacting yields in Salinas, Watsonville, Santa Maria, and Oxnard. Markets are firming, while Florida is essentially finished for the season due to late planting and quality concerns. This shifting demand is putting additional pressure on California supplies.

California Citrus

Lemons: District 3 (CA Desert/AZ) is finished. District 1 (San Joaquin Valley) remains the main growing region until District 2 (Oxnard/Ventura) ramps up in late March/early April. District 1 is peaking in 115, 95, and 140ct, with markets rising on 165 and 200ct as product sizes up.

Imports/Specialities: **ESCALATED** The California Navel crop is skewed toward larger sizes, peaking on 56 and 72 count. Smaller sizes 113 and 138 count are very limited and expected to stay tight through the season and into early April. Flexibility on size and grade will be needed, with larger Navels used to fill orders. Suppliers will stick to contract size averages. Please inform schools and DOD programs and encourage 88 or 72 count acceptance.

Limes: **ESCALATED** The market remains elevated as supplies are very limited. New crop fruit is mostly small (230-250 count), with larger sizes scarce and commanding higher prices. Offshore supplies are adequate, but rain forecast in Veracruz later this week could further tighten the market.

STONEFRUIT: Imported peaches, plums, and nectarines are winding down. Nectarines are finished, and peaches are nearly done, with only small amounts expected late in the week. Imported plums will continue into April. Kiwi supplies from Greece and Italy are steady, while Chilean kiwi will begin in April. The last of the domestic kiwi has finished.

California Lettuce

Iceberg: Strong production is expected this week, with harvesting in Yuma, Santa Maria, and Huron. Despite warm temperatures, quality remains good, with weights averaging 39-44 pounds and very clean. Minimal discoloration and no internal burn have been reported. Suppliers are flexible on volume orders, so promote as much as possible this week.

Romaine & Romaine Hearts: Romaine, green leaf, and red leaf are all in good supply, with strong availability expected throughout the week. Production is active in Yuma, Santa Maria, and Huron, with Salinas starting next week. Romaine hearts remain plentiful, and shippers are flexible, so promote as much as possible. Quality across all leaf items is above average for weight, texture, and overall condition, and all value-added leaf items are off escalation.

Eastern and Western Vegetables

Bell Pepper: **ESCALATED** Florida supply is extremely limited, with mostly lower-grade product and declining volume as the season winds down. Mexico crossings are very light, with sizing challenges and growers diverting red peppers to green, tightening future red supply. Markets are expected to remain high and tight for the next 3-5 weeks, with meaningful relief unlikely until mid-April as Coachella production begins.

Eggplant: ESCALATED Florida's winter crop is nearly finished, with minimal production remaining. Mexico crossings are very light, keeping supply tight. Markets are expected to remain elevated until the Florida spring crop begins in early April.

Slicer Cucumber: ESCALATED Overall supply is extremely short, with demand far exceeding availability and prices at historic highs. Volumes from Mexico and Honduras are light, with only limited near-term relief from Sonora. Florida's spring crop, expected in mid-April, should provide the first meaningful improvement

Zucchini & Yellow Squash: ESCALATED Mexico is transitioning from Sinaloa to Sonora, with volumes expected to improve. Florida's spring crop is starting with strong fields and growing availability. Markets are expected to ease soon as supply increases.

English Cucumber: Eastern supply is primarily coming from Honduras, with limited volume and quality challenges. Florida fields are delayed, with gradual increases expected into April. Overall availability remains light to moderate in the near term.

Green Beans: Supply and quality will be mixed this week as most growing regions deal with weather-related pressure.

Melons

Cantaloupe: Offshore cantaloupes are available in California, Texas, Florida, and the Northeast. Pricing has increased due to strong demand, with retailers taking advantage of warmer temperatures and scheduled prebooks.

Honeydew: ESCALATED Offshore and Mexican are available but may face challenges throughout March. Plant virus issues in Guatemala and Honduras have left Mexican honeydews to help supplement the market.

Watermelon: ESCALATED Watermelon prices remain high; Mexican melons lead supply as offshore finishes and demand rises.

Mixed Vegetable

Artichokes: ESCALATED Quality is good, and supplies are limited.

Asparagus: ESCALATED Minimal Peruvian asparagus shipments arrive in Miami March 27, with added air freight for Easter demand, though ocean freight quality remains a concern. Milder El Niño weather is improving outlooks, with steady supply expected by mid-to-late April. Extreme heat in Sonora and Baja cut yields 15–30%, tightening supply and impacting quality. Northern Mexico production will wind down after Easter, shifting to San Luis Rio Colorado, while Southern Baja and Central Mexico ramp up from mid-April into May.

Broccoli/Broccoli Crowns: Supplies remain strong across all regions, and the market is expected to stay steady into next week.

Broccolini and Sweet Baby Broccoli: WATCHLIST Quality is fair, and supplies are extremely tight on this item.

Brussels Sprouts: Supplies remain very strong, with the market expected to stay steady and well supplied into next week.

Carrots: (JUMBOS, MEDIUMS, AND CELLOS) ESCALATED Bakersfield harvest is finished, with only light activity in the Imperial Valley. California supplies should improve in 3–4 weeks as warm, dry weather allows the crop to size up. Early harvesting in Bakersfield produced small carrots, forcing growers to slow picking to let the crop develop. Stronger sizing and better availability are expected in the coming weeks.

Cauliflower: Supplies remain solid across all regions, with the market expected to ease slightly heading into the weekend.

Celery: This market is soft for this commodity. Production in Yuma is light but available, while Oxnard and Santa Maria remain the primary growing regions offering the best deals. Value-added items show no price increases, and quality and texture remain above average across most suppliers.

Cilantro: ESCALATED The market is active and supplies are very tight. High demand has continued. Growers should be able to cover normal volumes.

Corn: All corn available out of Nogales! We are seeing more supply and quality is improving.

Fennel: EXTREME The fields are seeing lower yields and therefore there is a shortage in supply. Pricing will stay escalated until supplies improve.

Garlic: The CA garlic crop is progressing with good quality, complemented by ongoing Mexican supplies.

Ginger: Supplies and market are steady.

Cabbage: Steady with mixed pricing; seeing firm availability.

Green Onions: WATCHLIST Supplies tight; market remains high.

Kale (Green): Kale supplies and quality remain strong, with similar conditions expected into next week.

Mushrooms: Excellent supplies and availability.

Napa Cabbage: ESCALATED Quality and supplies are improving.

Parsley (Curly, Italian): ESCALATED Supplies and quality look good.

Rapini: Quality is good, but supply continues to be light. The market is strong and therefore the supplies will continue to be light.

Red Cabbage: WATCHLIST Quality is good, but supplies are light.

Snow and Sugar Snap Peas: WATCHLIST Imports have been affected by cold weather - limiting yields. Demand is steady and markets remain elevated. Quality is reported as fair.

Spinach: WATCHLIST Supplies are limited with some growers and quality is good.

Spring Mix: WATCHLIST Supplies on Spring mix are tightening up with insect damage affecting some of the varieties. We have added this item to the watchlist.

ONIONS

Onions are available in Washington, Idaho, and Utah, with demand increasing as we monitor quality late in the storage season. Onions from Mexico and Texas are also available. Transportation costs are impacting the market, with fuel prices up about \$1 week over week in many areas.

POTATOES

Supply and demand are strong, with sheds offering deals on 40 and 50 count and #2s. Smaller counts are becoming harder to find. Burbank potatoes are now available, with Norkoth as the main variety. Washington potatoes are peaking on mid sizes with excellent quality, while large and smaller counts remain tight. Florida color potatoes are limited due to the freeze. Transportation costs are impacting the market, with fuel up about \$1 in some areas. in some regions.

TOMATOES

Round and Roma Tomatoes: ESCALATED Supplies of Roma, round, and grape tomatoes are tightening due to freeze damage, weather, and production issues in Florida and Mexico. Roma tomatoes are under the most pressure, with limited volume expected into early May. Round tomatoes remain short, and grape tomato supplies are gradually tightening. Overall quality is inconsistent, and supply is expected to stay constrained in the coming weeks.
