

OVERVIEW

Tariff Update: President Trump has officially confirmed that tariffs under the USMCA (United States–Mexico–Canada Agreement) will not be implemented on fresh produce from Canada and Mexico. As such, shipments from these two countries will remain unaffected. However, a 10% tariff as well as an additional 5% reciprocal tariff will apply to fresh produce imported from other countries, potentially impacting pricing and availability for products sourced outside of Canada and Mexico.

After weeks of transition, harvest has officially moved to Yuma. Early desert romaine and leaf are cleaner and stronger than the final Salinas lots. Yields remain light and weights need time to normalize, but overall quality is solid.

The Central Coast saw over 6 inches of rain, effectively ending Salinas and leaving Santa Maria and Oxnard berry growers dealing with saturated fields. Strawberry yields will stay low for about three weeks. Oxnard is steady but can't offset declines elsewhere. Fruit quality is soft with higher bruising and mildew. Central Mexico supplies are improving slowly, Baja remains behind, and Florida is just starting. Open market fruit will stay tight heading into Thanksgiving.

Oxnard celery harvest is slowed by muddy fields. Product is heavy and hard to move, even with transfers going to Yuma.

Brussels sprout supplies are tight during the transition south. Rain, strong demand, and the coastal–desert gap are keeping markets firm, especially for value-added packs. Quality is fair.

Central Mexico is helping stabilize several categories, with seasonally light but steady crossings supporting berries and wet veg.

Idaho potatoes have excellent quality and strong supplies, but transportation is a growing issue. Tight carrier capacity in the Northwest and high freight costs on low FOBs are slowing movement.

Overall, desert production is improving. Despite weather, freight challenges, and tight availability, conditions are trending positive heading into the holidays.

TRANSPORTATION:

Expect 48-hour dwell times and loading delays as northern product fills the pipeline. Truck market will be active this winter; updates and solutions forthcoming.

WEATHER:

Florida: Warm and mostly dry through Sunday, highs upper 70s–mid-80s, lows 50s–60s, winds 15–20 mph.

California: Clouds increase Wednesday with a low-pressure system. Light showers overnight through early Friday ($\frac{1}{4}$ "– $\frac{3}{4}$ "), then clearing with highs upper 50s–low 70s and inland lows mid-30s over the weekend.

Mexico: Warm and mostly dry, highs mid-70s–mid-80s, lows upper 40s–upper 50s.

Arizona: Wetter week ahead with showers midweek through Saturday; dry Sunday. Highs low–mid 60s Friday, warming mid-60s–mid-70s Sunday; lows mid–upper 40s, rising to ~50.

FRUITS AND VEGETABLES

Tariff Update: President Trump has officially confirmed that tariffs under the USMCA (United States–Mexico–Canada Agreement) will not be implemented on fresh produce from Canada and Mexico. As such, shipments from these two countries will remain unaffected. However, a 10% tariff will apply to fresh produce imported from other countries, potentially impacting pricing and availability for products sourced outside of Canada and Mexico.

Avocados: Markets remain soft with ample fruit and lower demand. Flora Loca and Aventajada are currently being harvested and shipped, both with dry matter and oil content in the mid-to-high 20s.

Pineapples: **ESCALATED** Costa Rica crownless in high demand. Prices rising, potential substitutions, cancellations, and port delays.

Grapes: **ESCALATED** Strengthening: green tight, some finished; reds available into mid-December. Peruvian imports arriving, volumes rising late Nov–early Dec.

Bananas: Banana supply remains stable despite strong demand for school business rapidly ramping up. Overall, banana quality has been very good.

Apples: The 2025 new crop is still ramping up. Reds, Fujis, and Pinks remain somewhat tight as the old crop phases out and the new crop comes in. Old crop Pink inventories are being stretched as we wait for the new crop to fully color. Gala and Honeycrisp supplies are strong, with Granny Smith and Golden Delicious improving steadily each week.

Pears: The pear market remains steady, with strong production of Anjous, Bartletts, Bosc, and Red varieties.

Blueberries: Peruvian supplies are past their peak, though additional containers are still on the way, keeping markets steady. Central Mexico is increasing production through McAllen, Texas, and quality has been very good from both regions. We expect these conditions to hold as we move into December.

Raspberries: Supplies remain steady out of Central Mexico, Baja, and California.

Strawberries: **WATCHLIST** California needs 7–10 days to recover from heavy rain; Santa Maria likely done. Markets tight. Central Mexico increasing, Florida starting small volumes, Baja in ~2 weeks.

CALIFORNIA CITRUS

Lemons: WATCHLIST ON SMALL SIZES (165's and below) Markets strong; District 1 light harvest starting; District 3 tapering; small sizes tight; Mexico shipping via South Texas.

Imports/Specialities: Blood Oranges will be finishing for the season in the next few weeks. Sizing is running small. Grapefruit is available with light supplies on Fancy grade; choice grade is available. Cara's, Minneolas and Mandarins are all but finished for the season.

Limes: Supplies have rebounded following last week's price spike caused by weather delays in Veracruz. Manifests are peaking on medium to large fruit, with smaller sizes limited as the rain encourages fruit to size up. Offshore Honduran and Colombian fruit is available in the East.

STONEFRUIT

Imported peaches and nectarines are expected to begin arriving on both coasts around mid-December. Pomegranates, persimmons, and Asian pears will be in strong supply throughout November and December. The domestic kiwi market is projected to remain steady, though at elevated price levels.

CALIFORNIA LETTUCE

Iceberg: ESCALATED Yuma slightly better, Huron finishing; value-added lettuce prices remain high, with defects and 34–38 lb cartons.

Romaine & Romaine Hearts: ESCALATED Romaine and Romaine heart quality are okay, but supplies are tight.

EASTERN AND WESTERN VEGETABLES

Green Bell Pepper: Steady supply available from all growing regions Quality is good

Color Bell Pepper: Steady supply available from all growing regions Quality is good.

Eggplant: Cooler weather in Georgia has sharply reduced eggplant production, tightening supplies and pushing FOB prices higher. Florida's new crop should begin in 7–10 days, easing the shortfall. California supplies remain steady, and Mexico's first harvest is underway with stronger volume expected next week.

Slicer Cucumber: Stable supply crossing through Otay and McAllen. Domestic supply out of Georgia is wrapping up this week and will transition to North Carolina and Tennessee. Quality is outstanding in the west and fair in the east.

Zucchini & Yellow Squash: Mexico: Zucchini steady; yellow squash tightens after heavy supplies, pushing mid-month prices up. Georgia: Production stops this week due to freeze. Florida: Light volumes; Atlantic fields mostly spared. Mexico drives supply as markets rise.

English Cucumber: Strong, steady production with excellent quality loading out of Mexico. NC winding down, Georgia peaking but expected to slow with cooler temps and higher demand.

Green Beans: Supply and quality will be mixed this week as most growing regions deal with weather-related pressure.

MELONS

Cantaloupe: ESCALATED Westside cantaloupe supplies are low, keeping prices high with mostly 9s; sizing is limited, with offshore arrivals expected by mid-November.

Honeydew: The Westside deal is ending as production shifts to Brawley/Yuma, though recent heavy rains have delayed the transition. Limited supplies and strong demand are pushing the market higher until offshore product ramps up. Mexican honeydews are available in Nogales, with fields mainly producing sizes 4, 5, and 6.

Watermelon: Domestic watermelons are available from both coasts, but prices are rising as supplies decline. Mexican watermelons via Texas and Nogales are limited due to rain-related production impacts last month.

MIXED VEGETABLE

Artichokes: ESCALATED Quality is good, and supplies are limited.

Asparagus: ESCALATED Peru delays create oversupply, pushing down small/standard sizes. Northern harvests rise; Mexico/Baja heavy on smalls. Supplies tighten ahead of January Caborca start.

Broccoli/Broccoli Crowns: ESCALATED Quality looks okay, and supplies are still limited.

Broccolini and Sweet Baby Broccoli: WATCHLIST Quality is fair, and supplies are extremely tight on this item.

Brussels Sprouts: EXTREME Supplies are limited.

Carrots: (JUMBOS, MEDIUMS, AND CELLOS) Harvest is underway in the Cuyama/Lancaster area and will continue through November. No sizing issues are expected in the near future. Please remember to submit snack pack orders at least 48 hours in advance.

Cauliflower: ESCALATED Supplies are limited but gradually improving, with further gains expected next week.

Celery: ESCALATED Heavy rain slows production; Salinas done, Yuma after Christmas. Value-added items priced higher; limited availability all sizes.

Cilantro: ESCALATED The market is active and supplies are very tight. High demand has continued. Growers should be able to cover normal volumes.

Corn: Steady supply in the west and transition to South Georgia is underway in the east. Markets eased back this week and should see a smooth transition continue. Quality remains good but we will start to see some maturity issues on the local crops such as smaller ear size and kernel size will decrease once we settle into the fall production regions.

Fennel: EXTREME The fields are seeing lower yields and therefore there is a shortage in supply. Pricing will stay escalated until supplies improve.

Garlic: The new California garlic crop is progressing with good quality, complemented by ongoing Mexican supplies.

Ginger: Supplies and market are steady.

Green Cabbage: ESCALATED Supplies have tightened up, but quality still looks good. We are seeing poor yields in the VA cabbage as growers are trying to limit the core in the finished product.

Green Onions: WATCHLIST Supplies and quality look good but there have been some initial reports of light supplies.

Kale (Green): Supplies have improved, and quality is good.

Mushrooms: Lighter volume available due to transitions and production forecasts that were made below actual demand. Quality is good.

Napa Cabbage: ESCALATED Quality and supplies are improving.

Parsley (Curly, Italian): ESCALATED Supplies and quality look good.

Rapini: Quality is good, but supply continues to be light. The market is strong and therefore the supplies will continue to be light.

Red Cabbage: **WATCHLIST** Quality is good, but supplies are light.

Snow and Sugar Snap Peas: **WATCHLIST** Supply from Guatemala has slowed due to weather, while Peruvian production remains steady with fair quality. Domestic availability is limited and only fair at best, keeping prices elevated across the market.

Spinach: **WATCHLIST** Supplies are limited with some growers and quality is good.

Spring Mix: **WATCHLIST** Supplies on Spring mix are tightening up with insect damage affecting some of the varieties. We have added this item to the watchlist.

ONIONS

Onions are currently shipping from California and New Mexico. In California, harvest has transitioned from the desert to Central CA. New Mexico is offering a mix of U.S. and Mexican crop, though quality concerns persist due to ongoing heavy rains and flooding. Demand remains strong, with both domestic and Mexican supply keeping the market active.

POTATOES

Potato supply in for the remainder of the year will be fully supported by storage shipments, with no major challenges anticipated. Sizing and overall availability are expected to be strong across all categories. Burbanks will begin to ship in limited volume in mid-October, though Norkotahs will continue to make up the majority of the supply. The long-term outlook mirrors last season, when the market remained relatively soft until late spring, at which point tighter supply led to higher FOB pricing.

TOMATOES

Round and Roma Tomatoes: **WATCHLIST** East cooler with brief freeze; romas tight, rounds adequate. Central Mexico mainly via McAllen; eastern grapes tight. Active markets through next week.

Snacking Tomatoes: **(Cherry, Grape and Medley)** Florida leads; Baja and Central Mexico supply until December.
