& Phoenix Seminars Present

Safe Patient Handling

Safe patient handling is critical for the health and well-being of both patients and staff. Learn:

- New York State requirements for safe patient handling — the committees, policies and procedures that every home should have in place.
- Best practices on safe patient handling.
- Insurance savings earned by having proper safe patient handling protocols in place.

Intended Audience: Nursing directors, Administrators, Healthcare risk managers

Tuesday, December 7, 2021 12:00 – 1:00 pm

Speaker

Megan Coville, MS, OTR/L, ARM, CSPHP

Senior Risk Management Consultant  **ONEGROUP**®

An occupational therapist with expertise in safe transfer and movement of patients, Coville helps One Group clients develop staff training, injury reporting and investigation programs, and return to work strategies. She is a primary member of the NYSARC Partners Group risk management service team and a member of the NYS Safe Patient Handling Conference committee (and regularly presents at its annual event).

In addition to her degree in occupational therapy, Megan earned an Associate in Risk Management in 2018 and designation as a Certified Safe Patient Handling Professional by the Association of Safe Patient Handling Professionals.
