## ABOUT IMBUE

DR. GURWIN

*"As a physician I was always skeptical about CBD but with such severe shoulder and back pain for over a year and the prospect of surgery I felt it was necessary to try something considered a little unorthodox for an MD. I consulted with a pain medicine physician and asked which brand of CBD I should try. Imbue is what was recommended and I started to use it the same day....within 3-4 weeks I noticed a difference...enough to definitively decide surgery would not be necessary...over time 1-2 months the improvement continued to the point that after 3 months the pain was virtually eliminated. I have continued to use the product every night and not only does my back and shoulder feel about 90-95% of what it did before it all started but my sleep which had been affected even before that has now improved. I was a skeptic...but no longer."*
