COVID-19 Community Level: **MEDIUM**

Per the CDC's COVID-19 Community Index tool, Inyo County is currently considered to be in the **MEDIUM** level of community COVID-19 transmission.

The COVID-19 Community Index was developed by the CDC to help communities guide local COVID-19 prevention measures.

Levels include **LOW**, **MEDIUM**, and **HIGH**

The COVID-19 Community Index is based on factors like new hospital admissions, the percentage of inpatient hospital beds occupied by patients with COVID-19, and the total number of new COVID-19 cases over the past 7 days.

Low	Medium	High
<ul style="list-style-type: none">Stay up to date with COVID-19 vaccinesGet tested if you have symptoms	<ul style="list-style-type: none">If you are at high risk for severe illness, talk to your healthcare provider about whether you need to wear a mask and take other precautionsStay up to date with COVID-19 vaccinesGet tested if you have symptoms	<ul style="list-style-type: none">Wear a mask indoors in publicStay up to date with COVID-19 vaccinesGet tested if you have symptomsAdditional precautions may be needed for people at high risk for severe illness

People may choose to mask at any time. People with [symptoms, a positive test, or exposure](#) to someone with COVID-19 should wear a mask. Masks are recommended in indoor public transportation settings and may be required in other places by local or state authorities.

Summary of Case Trends – through May

As of May 30, 2022, the United States has recorded more than 81 million confirmed COVID-19 infections, nearly 1 in 4 people. According to recent CDC estimates, approximately 60% of Americans have been infected with COVID-19.

During the month of May, Inyo County experienced an increase in the 7-day average of new COVID-19 cases and moved from a **LOW** COVID-19 Community Index to a **MEDIUM** COVID-19 Community Index.

Individuals should now take additional precautions to protect themselves and their families or loved ones from COVID-19.

Inyo County's COVID-19 cases increased from **47 total cases in April** to **174 total cases in May**, an approximate 270% increase.

Local Prevention Recommendations

Inyo County residents should continue to get vaccinated and boosted in order to provide sustained community protection.

Individuals should also consider wearing a mask on public transportation and in venues where the risk of COVID-19 transmission is high.

Individuals considered high-risk for severe illness should take additional precautions and consider wearing a mask indoors.

To find a vaccine provider, please visit: www.inyocounty.us/vaccine-clinics

Notes

As of 01/04/2022, COVID-19 case counts reflect cases confirmed by PCR and antigen testing.

Prior to 01/04/2022, only PCR-confirmed cases were included in data sets.

Due to the recent increase in COVID-19 cases locally and statewide, and the use of at-home tests, actual case counts may be underreported on California infectious disease reporting, and contact tracing platforms, and the Inyo County Public Health/COVID-19 Response webpages.

- There were six (6) COVID-19 cases with no known date of birth in January 2022
- There were three (3) COVID-19 cases with no known date of birth in February 2022
- There was one (1) COVID-19 case with no known date of birth in May 2022
