

Inyo County COVID-19 Response

COVID-19 Cases By Vaccination Status

Epidemiological Report | March 2023

Inyo County Quick Facts:

36

- As of March 27, 2023, there were 36* total COVID-19 cases for the month of March compared to 65 total COVID-19 cases for the month of February.

3 out
of 4

- As of March 27, 2023, 3 out of 4 breakthrough COVID-19 infections occurred 5 or more months after most recent dose of a COVID-19 vaccine.

**Case numbers may be incomplete*

Monthly Summary:

# Fully Vaccinated	% Fully Vaccinated	# Unvaccinated*	% Unvaccinated*
12,666	69.7%	5,506	30.3%

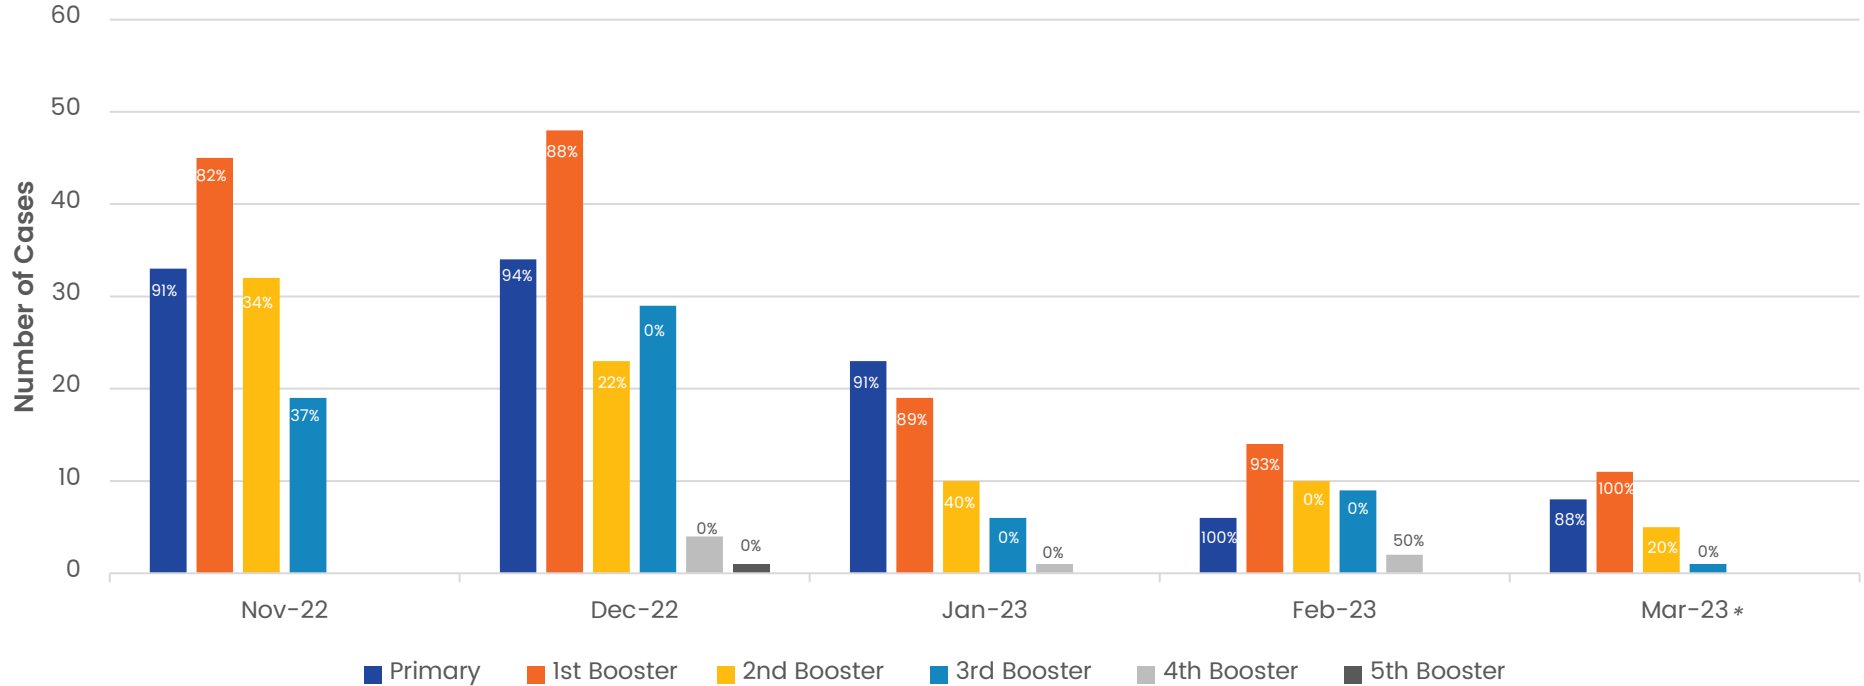

Inyo County vaccination statistics as of **November 8, 2022**, the most recent date that data is available:

- Fully Vaccinated individuals compose approximately 69.7% of Inyo County's vaccine-eligible population.
- Despite a possible vaccine waning effect 5 months from most recent dose of a COVID-19 vaccine, the rates of breakthrough infections corroborate the important role of booster doses in preventing COVID-19 infection and severe illness.

**Includes partially vaccinated persons*

Share of COVID-19 Cases* by Most Recent Dose of a COVID-19 Vaccine

November 2022 – March 2023 | 5-Month Period

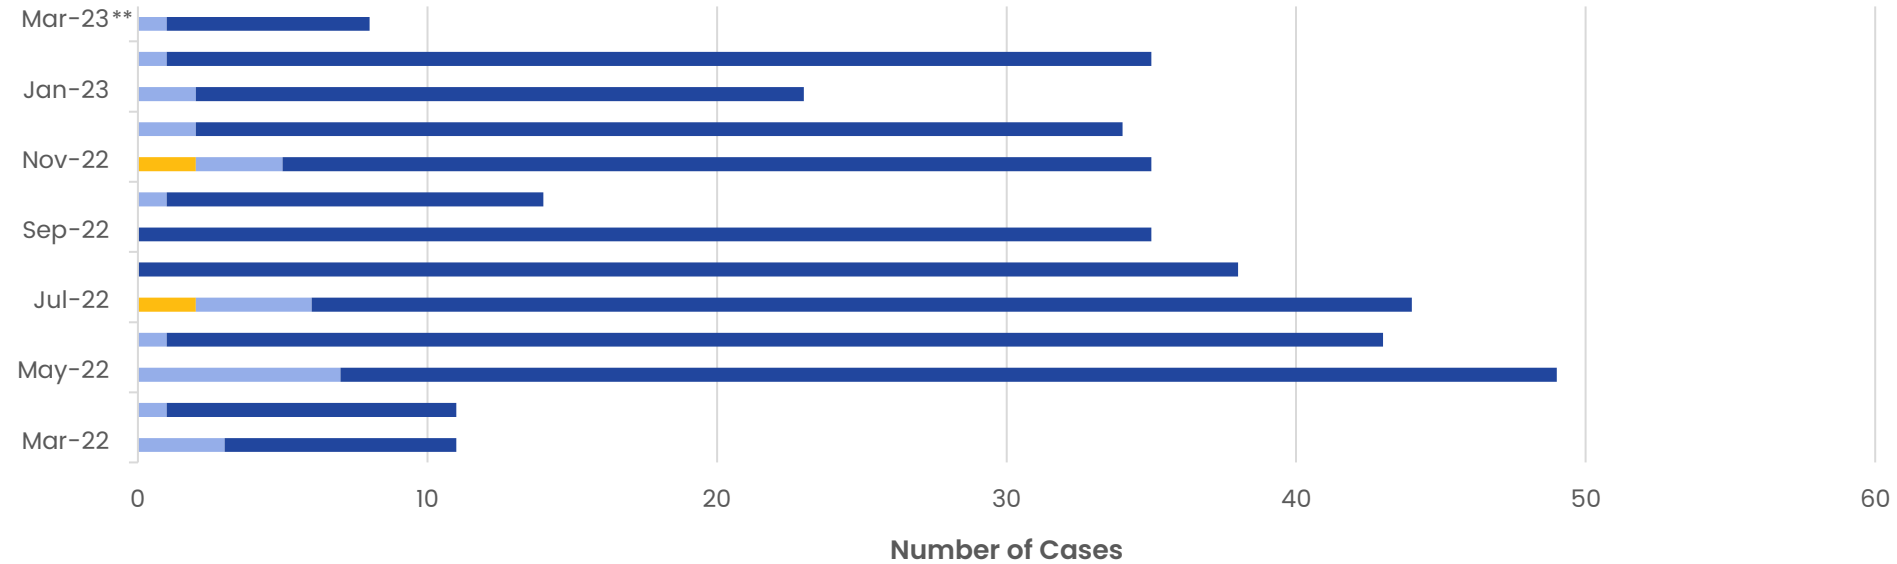

Percentages shown are the percent of cases that occurred 5+ months after most recent dose.

*Case numbers may be incomplete

Unboosted* Breakthrough Monthly COVID-19 Cases

March 2022 – March 2023 | 13-Month Period

Boosted within 14 days prior to COVID-19 infection

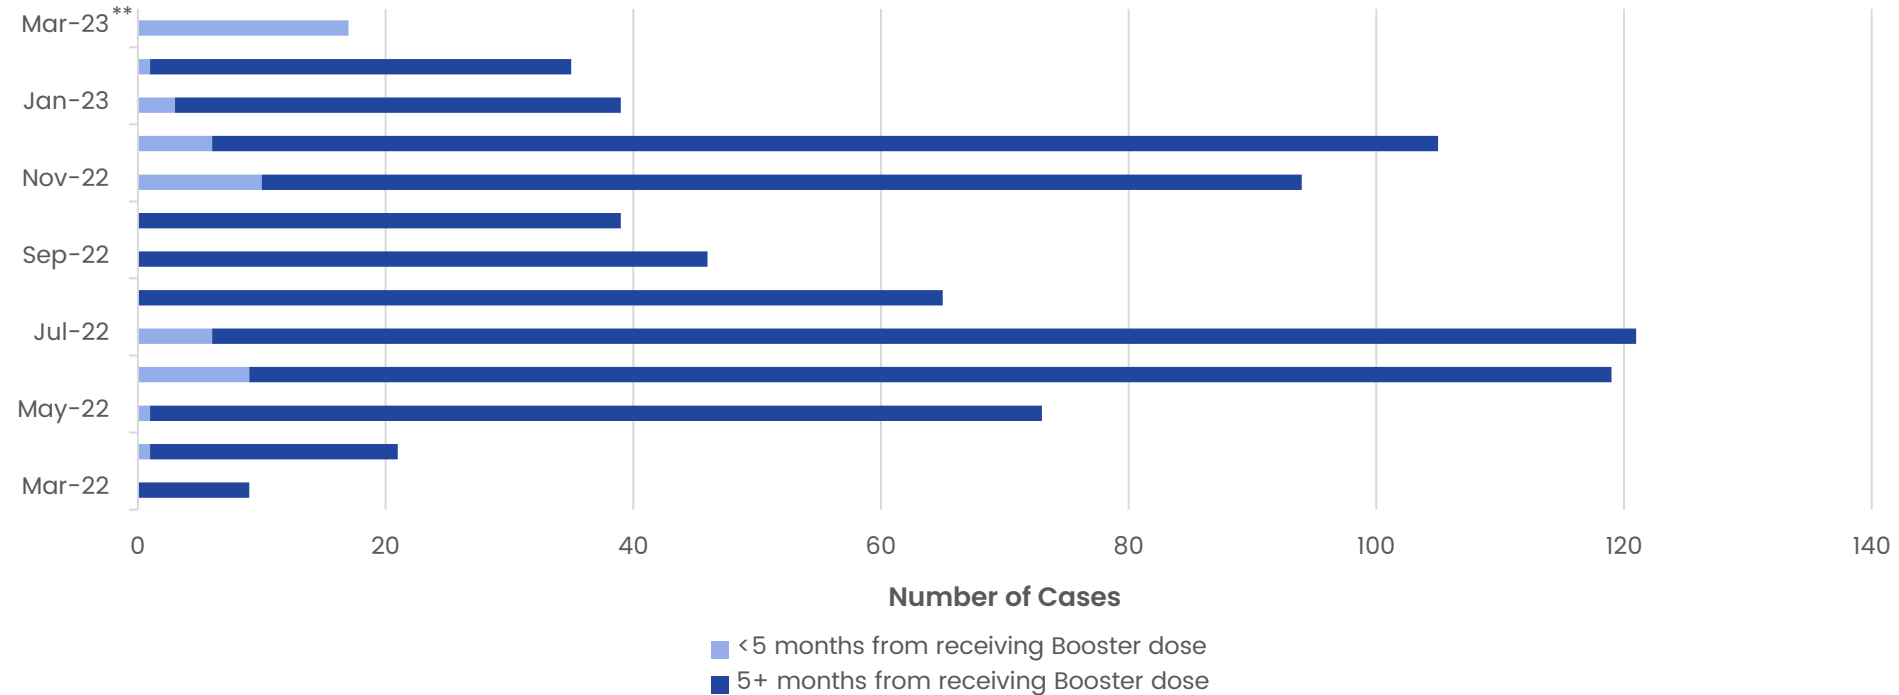

< 5 months from getting 2nd dose (or 1st dose if J&J)

*Persons who have not received a booster dose following primary series vaccination

**Case numbers may be incomplete

Boosted* Breakthrough Monthly COVID-19 Cases

March 2022 – March 2023 | 13-Month Period

*Persons who have received a booster dose following primary series vaccination

**Case numbers may be incomplete

Getting Boosted:

The CDC recommends that persons aged 5 years and older receive one updated (bivalent) booster if it has been 2 months or more since their last dose of a COVID-19 vaccine. This includes persons who received their primary series or one or more original (monovalent) booster dose/s at least 2 months ago.

Note & Data Sources:

Current analyses of COVID-19 among vaccinated individuals in Inyo County assesses **vaccine-eligible** individuals who received a positive COVID-19 PCR test result at least 14 days following the second dose of the currently available 2-dose mRNA vaccines (Pfizer or Moderna) or 14 days following the first and only dose of the currently available single-dose vaccine (J&J). Analyses are only estimates and data is subject to change.

Boosted breakthrough cases are defined as individuals with a COVID-19 positive PCR test result 14 days after receiving their 3rd dose if initially vaccinated with a two-dose series vaccine or 14 days after receiving their 2nd dose if initially vaccinated with the single-dose series J&J vaccine.
