# WEEKLY EPIDEMIOLOGICAL REPORT

DECEMBER 5, 2022

# COVID-19 PREVENTION

## COVID-19 Testing, Quarantine, and Isolation Recommendations

**Individuals who have been exposed to COVID-19 but are not infected** should no longer quarantine, however, testing for symptomatic individuals and their close contacts should continue. Individuals who test positive for COVID-19 should isolate at home for five days and wear a mask for ten days when around others in private and public settings.

**Individuals with moderate to severe COVID-19** should isolate for 10 days and those who are immunocompromised should consult with a physician about ending isolation following a COVID-19 infection.

## Masking Recommendations

Actions for prevention and management of COVID-19 utilize the CDC's COVID-19 Community Levels criterion introduced in February 2022, recommending that **universal masking occur in areas where the COVID-19 Community Level is High** and that **immunocompromised individuals wear a mask in areas where the COVID-19 Community Level is Medium.**

# WEEKLY COVID-19 QUICK FACTS

- Current COVID-19 Community Transmission Level: **MEDIUM**
- Local Recommendations for COVID-19 Prevention:
  1. **All vaccine-eligible residents should complete their primary COVID-19 vaccine series and receive a booster dose**  
(To find a local vaccine provider, please visit [www.inyocounty.us/vaccine-clinics](http://www.inyocounty.us/vaccine-clinics))
  2. **Those at high-risk for severe illness should take additional precautions including avoiding non-essential indoor activities in public spaces where exposure could occur**
- There are currently **NO** Inyo County **COVID-19 related mandates** in place.

# ABOUT COVID-19 COMMUNITY LEVEL

Low	Medium	High
<ul style="list-style-type: none"><li>Stay <a href="#">up to date</a> with COVID-19 vaccines</li><li><a href="#">Get tested</a> if you have symptoms</li></ul>	<ul style="list-style-type: none"><li>If you are <a href="#">at high risk for severe illness</a>, talk to your healthcare provider about whether you need to wear a mask and take other precautions</li><li>Stay <a href="#">up to date</a> with COVID-19 vaccines</li><li><a href="#">Get tested</a> if you have symptoms</li></ul>	<ul style="list-style-type: none"><li>Wear a <a href="#">mask</a> indoors in public</li><li>Stay <a href="#">up to date</a> with COVID-19 vaccines</li><li><a href="#">Get tested</a> if you have symptoms</li><li>Additional precautions may be needed for people <a href="#">at high risk for severe illness</a></li></ul>

People may choose to mask at any time. People with [symptoms, a positive test, or exposure](#) to someone with COVID-19 should wear a mask. Masks are recommended in indoor public transportation settings and may be required in other places by local or state authorities.

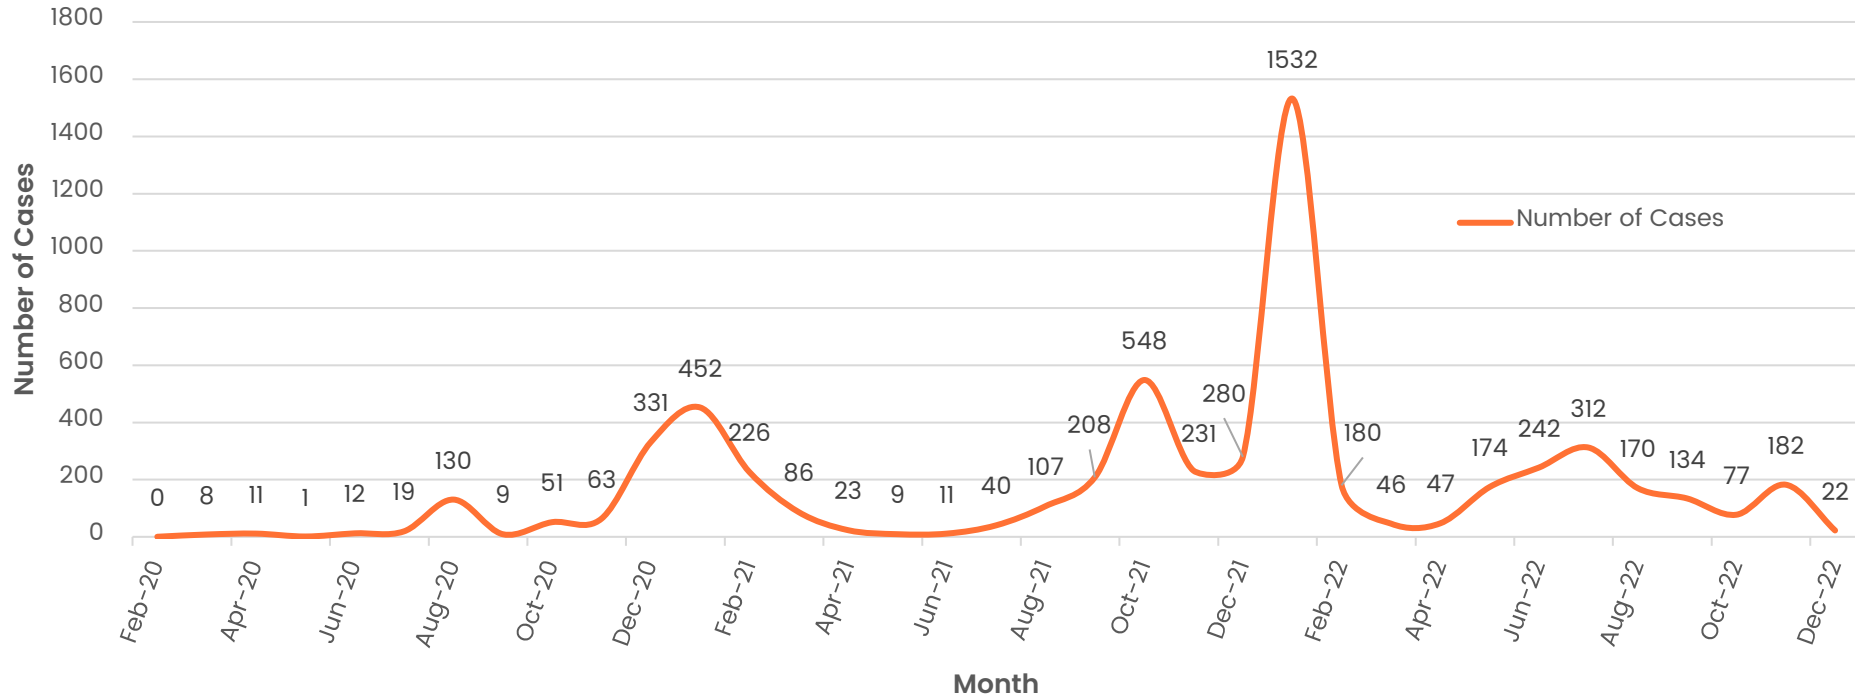

The COVID-19 Community Index was developed by the CDC to help communities guide local COVID-19 prevention measures.

Levels are based on factors like new COVID-19 hospital admissions, the percentage of inpatient hospital beds occupied by patients with COVID-19, and the number of new COVID-19 cases over the past 7 days.

For additional information on the CDC's COVID-19 Community Levels Tool, please visit: [www.cdc.gov/coronavirus/2019-ncov/your-health/covid-by-county.html](https://www.cdc.gov/coronavirus/2019-ncov/your-health/covid-by-county.html)

# Total All-Time COVID-19 Cases

February 2020 – December 2022 | 35-Month Period
