Inyo County COVID-19 Trends: Vaccinated vs. Unvaccinated Cases

Data through October 2021

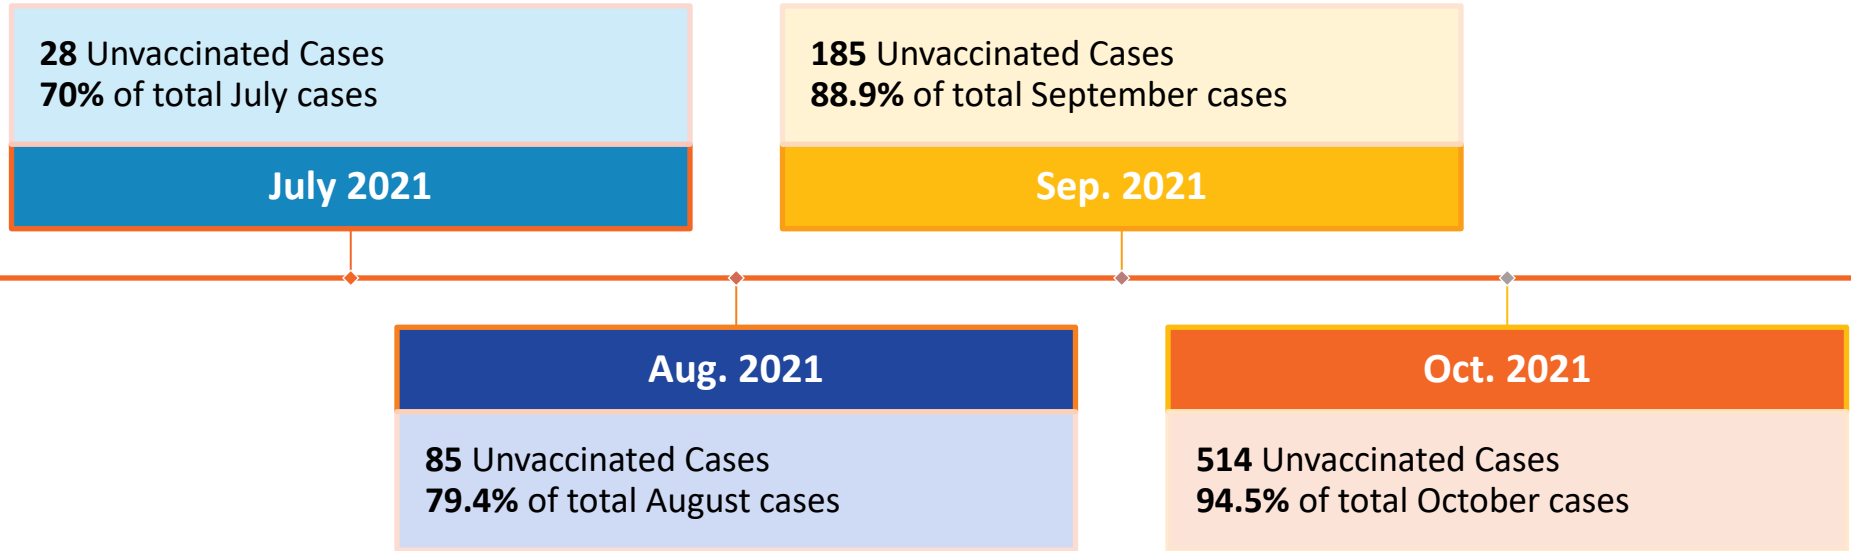

Monthly Total Vaccinated vs. Unvaccinated COVID-19 Cases

COVID-19 Trends in Vaccinated Individuals

COVID-19 Trends in **Unvaccinated** Individuals

Note:

As transmission rates increased for the month of October 2021, the number of vaccinated individuals with COVID-19 remained low while the number of unvaccinated individuals, comprised of children and adults, increased exponentially

i.e.

185 total unvaccinated COVID-19 cases in September to

514 total unvaccinated COVID-19 cases in October

Data Sources:

*Data on vaccinated COVID-19 cases obtained from [CAIR II](#), California's statewide immunization reporting platform

*Data on total COVID-19 cases in Inyo County obtained from California's infectious disease and contact tracing platforms [CalRedie](#) and [CalConnect](#) and Inyo County internal data sources
