

CORONAVIRUS (COVID-19) Decontamination Services Offered by Crystal Clean

Crystal Clean is proud to offer decontamination and disinfectant service for large and small square footage industrial and office facilities. Additionally, the company can manage transportation and waste disposal of any contaminated debris and waste byproducts. The increased spread of Coronavirus has led to a need for businesses and other locations to decontaminate common surfaces and dispose of potentially contaminated materials. According to the CDC, Coronavirus can remain active on a hard surface for days and can be difficult to detect. Our solution is FDA and EPA approved and all impacted areas will be sprayed or wiped with a minimum of one minute of contact time. Post treatment all areas will be wiped with a disinfectant as well.

Crystal Clean's Field Services has a great track record of emergency clean up response. Decontamination teams can be at your business with a quick turnaround time. Don't give yourself the added stress and anxiety of supervising under-skilled workers, call the experts at Crystal Clean and decontaminate your business today.

CDC & EPA Approved Disinfectants

Crystal Clean only uses CDC approved and EPA registered disinfectants to decontaminate your surfaces. The cleaning products are chosen from the EPA's List N, meeting the criteria to use against the Coronavirus.

Full PPE Equipped Personnel

All personnel involved in the decontamination process are fully outfitted with proper Personal Protective Equipment (PPE). An emphasis on correct and consistent use, as well as proper fit, means that personnel are fully protected.

Waste Disposal Services

Crystal Clean's years of experience in waste disposal stands as proof of our ability to be a safe and reliable partner. Along with proper and compliant disposal, you will also be provided with all necessary documentation.
