Winter 2018

Digital Music Technology

Teen social club

This six week teen social club is funded through the Department of Developmental Services. It is available for children ages 10 -15 who have completed the eligibility process through the department.

Come have fun and learn how to use cool music apps to make digital music with your friends. Bring your own Apple device to explore lots of new ways to compose, improvise, and record songs using your iPhone, iPod or iPad.

While rocking out, group members will have a chance to develop social relationships, expand their communication skills and have an outlet for self-expression.

You won't want to miss this jam session to get together with friends, new and old, and make awesome music!

We provide:

- Certified teachers
- Dinner
- Visual and procedural supports as needed
- Small group format
- 1:5 ratio
