

The Story of How Sister March Developed a Relationship with Sister Delta Kappa Gamma

Sister March began her journey as an elementary counselor educator who received an invitation from Sister Society to visit with one of the Chapter Meeting and met for the first time Sister Delta Kappa Gamma. Sister March was amazed with the activities and the speaker at the Chapter Meeting. The Chapter member named Sister Society introduced her to other members of the Chapter and recommended Sister March for membership to Sister Delta Kappa Gamma. And so, the orientation and the process began. Soon Sister March completed the application and was invited by the Chapter to become a member of the Delta Kappa Gamma Society International. The date was announced for her induction ceremony and she was so excited!

After the ceremony and paying her dues to the Chapter Treasurer, Sister March noticed outside the window an incomplete sculpture that needed many workers to complete. Sister Delta Kappa Gamma announced that it would take a group effort in order to complete. She said the name of this sculpture was "Supporting Members".

The first Chapter Member named Sister April, came out and began the sculpture with the foundation sphere of "Creating New Membership Opportunities." The second Chapter Member named Sister May, came out and added the second sphere called "Enhancing Existing Membership Opportunities". A third Chapter Member named Sister June, came and added a third sphere named "Increasing Membership Awareness". Other chapter members looked out the window and saw the three spheres floating in the flower garden and wanted to add to the sculpture too!

Sister Violet came out and added to the first sphere with an emblem that said "Research Association Membership Trends". Sister Petunia added an ornament called "Develop Leadership Connecting" to the first sphere. Next, Sister Sunflower added to the first sphere a trinket with the words on it "Establish additional types of Membership Classification." Sister Geranium wanted to add to the sculpture by attaching a bauble to the first sphere which said "Establishing additional types of affiliations."

Another member of the Chapter named Sister Wildflower came to the meeting and saw the other Chapter Sisters building the beautiful sculpture and wanted to help it grow too. She came out and added some tinsel to the second sphere that was full of the words which said "Expand offerings at International Events". A Chapter member named Sister Begonia added to the second sphere trimmings connected with the words which stated "To promote mentoring of new educators." Sister Daisy emerged with adornments of words which said "Providing mentoring of new members" and placed them on the second sphere. Sister Iris came out and added some accessories to the second sphere which said "Establish efficient methods and timeless for dissemination of resources".

Sister Carnation was passing by the meeting location and saw all of the Chapter Sisters in the garden adding to the sculpture and wanted to help too! So, she looked in her trunk of her car and pulled out some special décor with the words on it that said "Define the role of members" and added it to the third sphere. Sister Carnation called some more members of the Chapter. Sister Tulip arrived with some garnish to add to the third sphere which said "Communicate the Value of Membership." Sister Lily arrived and added ribbons to the third sculpture which said "Attend to the sustainability of the Society." Sister Orchid arrived with an Uber driver and brought a laurel wreath with the words on it which said "Define the Organization." The last member of the Chapter Sister Lilac arrived and added a beautiful bow to the third sphere that had the words on it which said... "To promote the use of Society resources available to members."

All of the Chapter Sisters including Sister March, stood in amazement and admired what they had created by working together as a cooperative, supportive group of educators to create a common goal.

Sister Delta Kappa Gamma was so pleased to see the masterpiece that had been built by the many Chapter Sisters working together to assimilate a beautiful sculpture. She knew that this Chapter would use the goal and the plans presented on this sculpture to strengthen their Chapter and improve the Delta Kappa Gamma Society experience for every member.
