

Why Join PICMG?

- Early access to key technology
- Participate in specification development
- Leverage PICMG promotions & marketing efforts
- Develop relations with thought leaders and suppliers
- Gain visibility and leads from your products and content on the PICMG Web site
- Low-cost membership – Affiliates join for as low as \$1000

About PICMG

Founded in 1994, PICMG is a not-for-profit 501(c) consortium of companies and organizations that collaboratively develop open standards for high performance industrial, military/aerospace, telecommunications, test/measurement, medical, and general purpose embedded computing applications.

There are over 150 member companies that specialize in a wide range of technical disciplines, including mechanical and thermal design, single board computer design, very high speed signaling design and analysis, networking expertise, backplane and packaging design, power management, high availability software, and comprehensive system management.
