AGNES ONUOHA MEMORIAL HOSPITAL (AOMH)

The AOMH project is a 9-structure campus consisting of the following buildings:

- Agnes Clinic
- Doctors' Residence
- Utility Block
- Water Purification House
- Training/Conference Hall
- Radiology Building
- Administrative Block
- Hospital Chapel
- Nurses Hostel/Classes

AOMH GROUNDS

The AOMH project sits on 1.78 acres of procured farmland in Okai-Item Village, with a drilled water well reticulated to serve the hospital and its host community.

AGNES CLINIC

First building in the hospital campus - completed in 2024, electrification and fittings completed in 2025.

AGNES CLINIC COURTYARD

Throughout the 6-months rainy season, rainwater is harvested here, channeled though custom-built underground waterpipes, to underground reservoirs at the back of the building

DOCTORS' RESIDENCE

- 4 number, one-bedroom, all ensuite, doctors' apartments building. The building is fully completed. Plumbing and electrification are partially done

UTILITY BLOCK

- This building houses the hospital Kitchens and restaurant, the laundry, and living quarters for Senior Nurses and support staff

LEFT VIEW OF THE UTILITY BLOCK

- This side of the building (support-staff quarters) sits directly behind the water purification house.

WATER PURIFICATION HOUSE

This will house our industrial-sized Reverse-Osmosis Machine (already procured). The building has 2 administrative offices, the processing room, a storage hall, and hygiene facilities for staff.

TRAINING/CONFERENCE HALL

This 500-Seater Training/Conference facility is fully built and fitted with ceiling fans

Agnes Memorial

has a 50-bed inpatient capacity, an emergency room, an ambulance bay, and two modern surgical suites. A fully outfitted ambulance designed to navigate the rugged African terrain will prevent countless deaths by providing emergency transportation to patients.
