**Dollar amounts are calculated based on 100% column; rounding rules may vary across federal, state, and local programs.

Every year, the perimeters of the Federal Poverty Level (FPL) increase based on the cost of living. Families need to understand where they fall on the FPL so they know whether they are eligible for Medicaid in their state or whether they are eligible for a federal subsidy because they earn between 100 and 400 percent of the FPL, or whether they are eligible for a tax credit because they purchased a Silver plan and earn less than 250 percent of the FPL.

To qualify for Cost-Sharing, one must be enrolled in a Silver level plan through a Marketplace

Cost-sharing reductions are not available for coverage purchased outside of the Marketplace.

Individuals and families with household incomes generally up to 250% of the FPL may be eligible to receive cost-sharing reductions. Household income is determined by calculating a consumer's modified adjusted gross income (MAGI). Members of federally recognized tribes may qualify for additional cost-sharing benefits.

<i>Revenue Adjustments</i>	(\$254.0)	\$234.9	(\$19.1)
ENDING BALANCE	(\$24.4)	\$31.9	\$7.5

- Combined, recurring and nonrecurring General Revenue program needs before the Fall Conference season—including a minimum reserve of \$1 billion—are less than the available General Revenue dollars, meaning there is no budget gap for FY 2017-18. Anticipated expenditures, potential revenue adjustments, and the reserve can be fully funded and the budget will be in balance as constitutionally required.
- Although there is no budget gap in the first year, there is essentially no remaining General Revenue for discretionary issues—the projected surplus of \$7.5 million equates to just 0.02% of the General Revenue estimate for FY 2017-18.
- Further, the projected recurring expenditures and revenue adjustments, in combination, outstrip the available recurring resources by \$24.4 million.
