

Dear Parents,

Sapphire at School is pleased to join you for another year as your school's food service provider. With the new school year quickly approaching, the Sapphire at School team is working creatively to carry out our mission statement, *"to nourish and educate young people for a lifetime of well-being"*.

Sapphire at School is happy to revamp Serra Catholic's snack bar, offering a variety of retail and homemade snacks- all free of high fructose corn syrup & artificial food coloring. We are also pleased to provide a new Emergency Lunch Program in which your student will receive a well-balanced meal should there be a need. Snack bar items and Emergency Lunches will be charged to your student's account on our Point of Sale system.

This year, we are happy to launch our very own Sapphire at School online ordering platform. We have received informative feedback on our third-party ordering platform and have partnered with a development team to implement a user-friendly experience. You will be able to see pictures of our food, add, change or cancel up until midnight prior to service and opt for an auto-reload when your student's account is low. This new ordering platform is an integral part of our goal to offer parents a secure, convenient payment process and provide an efficient tool to pre-order meals and keep track of your student's snack bar activity. Please reference the Sapphire at School Portal attachment for links & instructions. To participate in the lunch program, snack bar and Emergency Lunch Program, you *must* register your student in our new system and pre-load funds. All you will need to sign up is your student's Sycamore ID, which can be obtained from either your school or by contacting the Sapphire at School staff.

Thank you for your participation in the Sapphire at School program. We anticipate an exciting year of change with the expansion of our services and look forward to serving your student(s) healthy and delicious meals.

Sincerely,

Lauren Rodriguez
