

## 1:1 Program News and Device Collection:

Student laptops have reached the end of their lease and will be returned after the close of school in June. All laptops will be collected in June before students leave for the summer break. Please watch for the collection schedule in the St. Serra Sunday Newsletter, which will also cover the collection of 2<sup>nd</sup> Grade iPads, and devices for students who are withdrawing from the school.

Over the past few months, the school conducted a pilot program with students in Grades Three to Seven to determine the best replacement product for the laptops that are being returned. After careful consideration and feedback from the students in our pilot and our administrators, we are excited to announce that the school will be moving to Chromebooks beginning in the 2021-2022 school year.

The school evaluated a number of Chromebook devices and has selected the Lenovo Chromebook 500e for its features, ease of management, and price. Additional news regarding the new Chromebook program will be shared in the St. Serra Sunday Newsletter over the next few weeks. For a quick peek on the new device that we will be using, please [CLICK HERE](#) to view a YouTube video showcasing this device.
