Hui for Excellence in Education, or "HE'E," is a statewide coalition of diverse stakeholders committed to working collaboratively to identify opportunities to improve public education. We work to provide Hawai'i families and organizations with a resource for educational policy.

We understand that SB 449 will not be heard, yet HB 636 may be heard by your committee. As you and your committee know, over the past years there has been great concern that given the primacy of educational challenges, complexities and expenses, HI DOE facilities have not been constructed or maintained with the speed and efficiency that would best support our students, staff and families. The overwhelming challenges that confront our DOE and BOE to best serve the educational needs of our keiki have prompted the legislature to establish the SFA to focus on strategic, efficient, accelerated development of needed school facilities and housing. We hope that the SFA will help to accelerate progress while collaborating with and closely supporting the DOE and the BOE.

Specifically, we support HB 636 which calls for and funds a planning database that can prioritize and inform spending on capital improvements on DOE facilities. We appreciate that it would be organized by legislative districts and complex areas so that families as well as legislators would understand their respective districts' facilities, conditions, and needs.

We urge SFA to work together with DOE to utilize this database. Clarity of priorities and progress enabled by this database can inform the DOE, BOE, and SFA to best manage and accelerate our facility advances.

Further, public transparency would help advocates understand what projects should be prioritized.

We thank you for this opportunity to share our thoughts.
