The Nelson Lecture Series is a gift from the late Constance Ruth (Nelson) Wise. She attended Capital in the '70s and earned a BM, Music Education in 1971. While attending Capital University, her eyes were opened to the world, race relations, and other religions; consequently, she would like her annual speaker series to be very open and progressive. She requested that the guest speakers and thought leaders support and embrace open dialogue and discussion on religion and various topics that support the mission statement and values of Capital University.
