## **BECOME A HEALTHTRAN VOLUNTEER DRIVER!**

HealthTran wants to ensure all rural community members are able to access the healthcare and wellness services they need to live a healthy life. Since 2014, we have found that even the most well served rural community often has gaps and challenges in transportation. This kick started HealthTran Volunteer Driver Program to fill these gaps. Since then, we have found that Volunteer Drivers offer so much more than transportation. Not only do our dedicated volunteers allow us to offer client-focused transportation, but our riders and volunteers form meaningful relationships that have lasting impacts.

### **There are many perks of being a volunteer:**

- Receive mileage reimbursement at \$0.80 per mile.
- Pick your own schedule – select the rides that meet your availability.
- Set your own limits – drive locally or long distance.
- Receive CIMA Volunteer insurance coverage.
- Receive a complimentary MRHA membership.
- Make a difference in your community.

### **To be a volunteer you must meet the following requirements and complete these simple steps:**

- Have had a valid driver's license for a minimum of 3 years
- Keep Driver's License, Auto Insurance, and Vehicle Registration up to date and submitted
- Complete the application and required signatures
- Pass a drug test and background check
- Attend or complete all required training
- Possess a personal cell phone
- Have access to a smartphone and/or personal computer
- Maintain a clean vehicle in safe operating condition
- Commit to drive at least once per month

### **How HealthTran works:**

1. HealthTran partners with community agencies to offer transportation to their clients.
2. HealthTran brings together all local transit providers into one technology platform to make scheduling rides and navigating transportation much simpler.
3. HealthTran recruits qualified Volunteer Drivers to supplement these options.
4. The community agencies schedule rides for their clients using the HealthTran ride scheduling platform by selecting the best fitting and most affordable option
5. Many of these rides go to our Volunteer Drivers – the volunteer then picks up and takes the client to their scheduled appointment and is reimbursed for the miles driven
