Real Talk

With these new legislation regarding Unions - less than 60% confirmed membership is interpreted as employees do not want a Union.

With no Union, there is no contract for that bargaining group.

With no Union, the City does not have to do equity adjustments, pay raises, provide safety gear.

With no Union the City can fire you at will, discipline you unfairly and not adhere to a grievance process.

If that is the work environment you want, then remain silent. If that sounds like the place you work in now and you want to change it STEP UP and join the Union.
