

I hope this email finds you well. I want to make sure you know about a new opportunity available through Alabama Community Colleges to develop customized training courses for your workforce at no cost to your company. Alabama has received a 17.8-million-dollar grant to cover the cost of new and incumbent worker training for Alabama businesses in **manufacturing, healthcare, IT, construction, and distribution/logistics**. If your company has a training need, we can develop a program customized to your specific needs with no tuition cost to your company. The funding will cover all training fees, including material and supply costs. No company match is required!

The program also provides training for supervisors and managers to identify mental health issues that might affect the production and efficiency of employees through the University of Alabama. This opportunity does not require a lengthy application and can cover almost any training need.

Please let me know if you have any questions or would like to discuss how your company can take advantage of this opportunity.
