Southeast AlabamaWorks Creates Business Friendly Career Tech Information

DOTHAN, Ala. - Southeast AlabamaWorks, the local regional workforce organization, announced today that it has created business friendly career tech information that will allow local businesses to quickly connect with local community college programs to find future employees.

"Southeast Alabama has three outstanding community colleges that are producing the workforce of tomorrow, and we want to make sure that our business and industry have the opportunity to quickly connect with career tech officials at each school. Knowing who to call and understanding the skills that each career tech class produces is great information for local businesses to have. We hope this will be useful and helpful information to both employers, future employees, and our community college partners," said Ann Marie Carr, executive director.

The three different documents are to serve as a quick link for business and industry to local career tech teachers and classes. Enterprise State Community College, Lurleen B. Wallace Community College, and Wallace Community College all have various career technical programs in a myriad of career opportunities. The document contains the:

- Name of the career tech program;
- Contact names, e-mails, and telephone numbers for career tech teachers; and
- Skills that students are acquiring in these specific career technical programs.

Connect with ESCC Career Technical Programs and Find Your Next Employee!

Airframe & Powerplant

- Inspect aircraft
- Troubleshoot aircraft faults
- Repair aircraft

Commercial Driver's License (CDL)

- Being able to work unsupervised
- Ability to work a flexible schedule
- Be able to handle stressful driving situations

Computer Systems Technology

- Computer hardware and software
- Networking
- Network Security

Mechatronics

- Electrical/Mechanical Maintenance
- Automation including PLC Programming
- Troubleshooting

Avionics Technology

- Test Aviation Electronics/Troubleshoot
- Aviation Electronics/Repair Aviation
- Electronics

Computer & Information Science

- Mathematical skills
- Problem-solving skills
- Logical reasoning skills

Emergency Medical Services

- Critical thinking skills
- Team building
- Self motivation

Medical Assistant Technology (MAT)

- Soft skills
- Multitasking
- Critical thinking skills

Business Administration

- Completion of the Accounting cycle
- Business communication
- Principles of management and supervision

Computer Graphics

- Time Management
- Collaboration/Communication
- Organization

Health Information Technology

- Analytical & technical skills
- High attention to detail
- Communication skills

Office Administration

- Customer service skills
- Communication skills
- Technology skills

Child Development

- Communication
- Complex Problem Solving/ Critical Thinking
- Creativity

Computer Programming

- Analytical thinking
- Designing and creating applications
- Understanding algorithms and data structures

Legal Assistant / Paralegal

- Critical thinking
- Effective Communication
- Reading/Writing

3D Modeling & Simulation

- Design
- Technological skills
- Visual problem sol
