---

## Session 2

### PCSS-MAT Live Waiver Eligibility Training

#### Faculty: *Anthony Dekker, DO, Primary Care with Chronic Pain and Addiction Specialty, Northern Arizona Veterans' Administration*

- The waiver eligibility training is available for physicians interested in seeking their waiver to prescribe buprenorphine in the treatment of opioid use disorders. In order to be eligible for the waiver to prescribe, providers are required to take 8-hours of training.
- PCSS-MAT uses a Half-and-Half format in which 4.25-hours are attended face-to-face with an instructor and is combined with an "on your own" computer-based self-study consisting of 5 modules and a 24-question exam (3.75-hours). The combined face-to-face training and the online computer-study/exam provides the required 8-hours needed to obtain the waiver to prescribe buprenorphine in the office-based treatment of opioid use disorders. The link to access part 2 will be emailed to all participants who complete the 4.25-hour session in its entirety. It is mandatory that all participants sign in at the beginning of the training and again at the end. The AOAAM cannot verify your attendance unless both signatures are confirmed on the roster. Participants are required to complete part 2 within 30 days of receiving the link.
- Following the 8-hour completion, physicians who have successfully completed the course may apply to the Substance Abuse and Mental Health Services Administration (SAMHSA) to obtain the waiver. You will receive an email with directions on how to receive your certificate of completion and apply for the waiver.
- Residents may take the 8-hour course and apply for their waiver once they receive their medical degree and their own DEA #.
- Physician Assistants and Nurse Practitioners are also eligible for the waiver but only after 24-hours of required training have been completed. PAs and NPs are encouraged to participate in this 8-hour training, along with an additional 16-hours of training. The 16-hours can be accessed here: <http://pcssmat.org/education-training/mat-waiver-training/>

**This course has been reviewed and is acceptable for 4.25 credits of AOA Category 1A by the AOA CCME sponsored through the AOAAM. It has also been reviewed and is acceptable for 4.25 Prescribed credit(s) by the American Academy of Family Physicians.**

*Physicians should claim only the credit commensurate with the extent of their participation in the activity. AAFP Prescribed credit is accepted by the American Medical Association as equivalent to AMA PRA Category 1 Credit™ toward the AMA Physician's Recognition Award. When applying for the AMA PRA, Prescribed credit earned must be reported as Prescribed credit, not as Category 1.*
