

ARIZONA PSYCHIATRIC SOCIETY

RESIDENT-FELLOW AND MEDICAL STUDENT

POSTER SUBMISSION AND PRESENTATION GUIDELINES

Guidelines for Abstract Submission

Posters are to present for preview new research and case findings or to present for peers recent best research or case findings. There shall be only one presenter per virtual poster (see Guidelines below for permitted substitutions). An abstract relating to the poster content shall be submitted by the stated deadline. After review, the submitting author will be notified if accepted for virtual poster presentation and given information regarding the specifics of presenting.

The presenter must be a member of a psychiatric residency program in the State of Arizona or registered as a medical student at a college of medicine in the State of Arizona as of the 2019-2020 academic year.

In addition to submitting the overall poster abstract (maximum of 3,000 characters, with spaces), which shall be a concise description of results, findings, and conclusions, the presenter shall submit (i) the poster title (maximum of 150 characters, with spaces) (Title should be brief, unique, and interesting), (ii) presenter information (name and credentials, affiliation, e-mail, and telephone), (iii) list all co-authors, separated only by commas (name and credentials, academic affiliation not required unless changed to be the substitute presenter), and (iv) provide the name of one to two topics that best describe the overall focus of your proposed session.

All presenters must be available to present at the meeting and must register for the meeting prior to the date of their presentation.

Guidelines for Virtual Poster Sessions

There may only be one presenter for each virtual poster and the presenter must be an investigator on the research study and included among the authors listed on the abstract submission. If the researcher or named first author who submitted the poster cannot attend the meeting and wishes to have a co-author substitute, please notify the APS administrative office (teri@azmed.org). The substitute presenter must provide contact information and agree to the APS Poster Guidelines in order to be included as the presenter in the Program. The substitute presenter will be considered the named first author for purposes of awarding any scholarship or prizes.

In order to be judged for any scholarship or prizes, the virtual poster must be presented. Any accepts accepted but not presented will be acknowledged in the Program, but will not be eligible for judging.

Research scientists/authors who are pharmaceutical company employees are eligible to present a poster (poster sessions are not an AMA PRA Category 1 Credit™ activity). However, pharmaceutical representatives (e.g., sales and marketing staff) are prohibited from presenting the poster or assisting during the poster presentation.

Posters must report only findings of the research. No advertising or product identification by brand name is allowed. If any or all of the work in this poster was prepared with commercial support, a statement "Supported by funding from [name of company]" must be noted in the lower left corner of the poster in Arial 72 point font, with no bold, italics, special colors, or other enhancement of the company name, product, or any other portions of the statement.

Generic names of drugs should be used throughout the poster; if brand names must be used, they must be used for all products referenced.

Information regarding unapproved uses of approved products or investigational uses of unapproved products must be clearly presented with the following statement included on the poster: "The following information concerns a use that has not been approved by the U.S. Food and Drug Administration."

The presenter must wear only their APS meeting badge and not badges or insignia of companies. No company or product identification may be included on badges or otherwise worn by the investigator.

Presenters may mention to participants other CME activities at the meeting, including industry-supported symposia, which relate to the research presented in the poster.

The presenter may not engage in product detailing and may not direct participants to particular exhibits at the meeting or other company-sponsored non-CME activities such as Product Theaters or Informational Programs, or otherwise "market" the company or any product.

Research results reported on the poster may not be displayed or distributed at the meeting by industry representatives or as part of a booth in the exhibit hall.

No CD-ROM or bound books may be distributed.

If providing handouts, the handouts must be limited to one page. The handouts must include the disclosure information on the funding of the research: "The research reported here was supported by [name of company]." Generic names of drugs should be used throughout in the handout. Any information regarding unapproved uses of approved products or investigational uses of unapproved products must include the following statement: "The following information concerns a use that has not been approved by the U.S. Food and Drug Administration."

The Poster Presentation

Poster content will be presented in a virtual setting. Accepted abstracts will be invited to have their first author present a multi-slide presentation limited to nine minutes or less for presentation, and allotted two additional minutes for Questions & Answers from the judging panel. Depending upon the number of accepted abstracts, there is a chance that additional sessions for presentation may be scheduled. The scheduling of these sessions will be coordinated through the APS Administrative Office.

Your presentation title slide shall include the abstract title and the name(s) of the author(s) in prominent lettering.

Guidelines for Scholarship Prizes

Scholarship prizes shall be paid in the form of check to the named first author (the poster presenter). In the instance of a substitute presenter, he or she shall be considered to be the named first author for the sake of scholarship prizes and recognition.

Prizes are awarded solely to the named first author (the poster presenter). Contributing, secondary authors will be recognized in the Program but will not be provided any portion of the scholarship prizes.
