# Building Learners of Tomorrow

The new Platte Purchase Middle School aims to immerse learners in simulated, real-world experiences across a variety of topics. **Flexibility** and **adaptability** are at the core of the design, allowing students to quickly shift mindsets, modalities, and technologies. Learning and collaboration spaces are designed to support various teaching and learning styles, giving students the opportunity to choose a comfortable environment best supporting their **academic** and **social-emotional needs**. Our team worked to re-imagine the visitor experience, welcoming community members securely with ample daylight and clear wayfinding to function as a community resource after the school day is complete. Learning is on display throughout, showcasing learning moments, works in progress, and finished projects to reflect the journey.

With an emphasis on multi-use spaces, a flexible auditorium allows the school and community to host various meetings and events, while corridors are activated to support technology and collaboration. Additionally, arts and performance spaces, outdoor learning areas, and athletics support extracurricular opportunities and embed school pride.
