Maryland Tax Connect

Add Your Individual Tax Account to Your Existing Business Profile

For clients who already have a Maryland Tax Connect business login.

Prepared by P+G Built Solutions

Important:	Do not create a new profile. Use your existing business User ID and password so your business and individual tax accounts are available under one login.

Start here:	Go to MDTaxConnect.gov and log in using your existing business credentials.

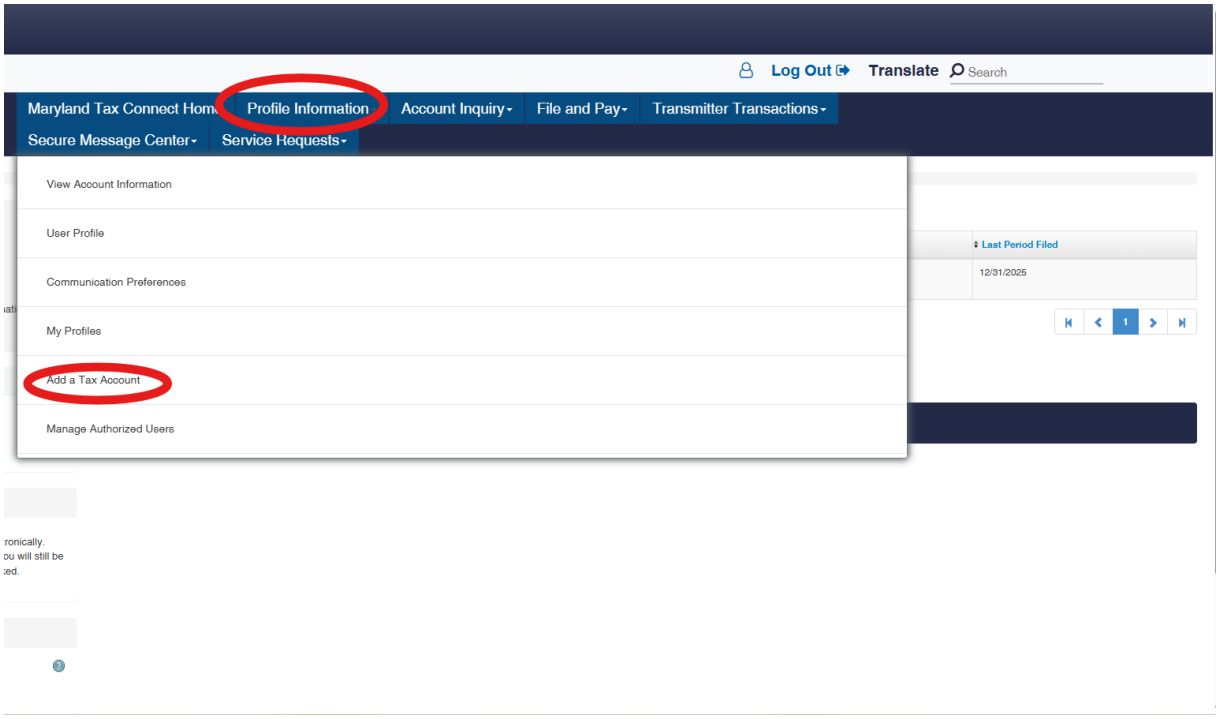

Start From Your Existing Business Profile

1 Log in with your business credentials

Go to MDTaxConnect.gov and sign in using the User ID and password for your existing business profile.

2 Open Add a Tax Account

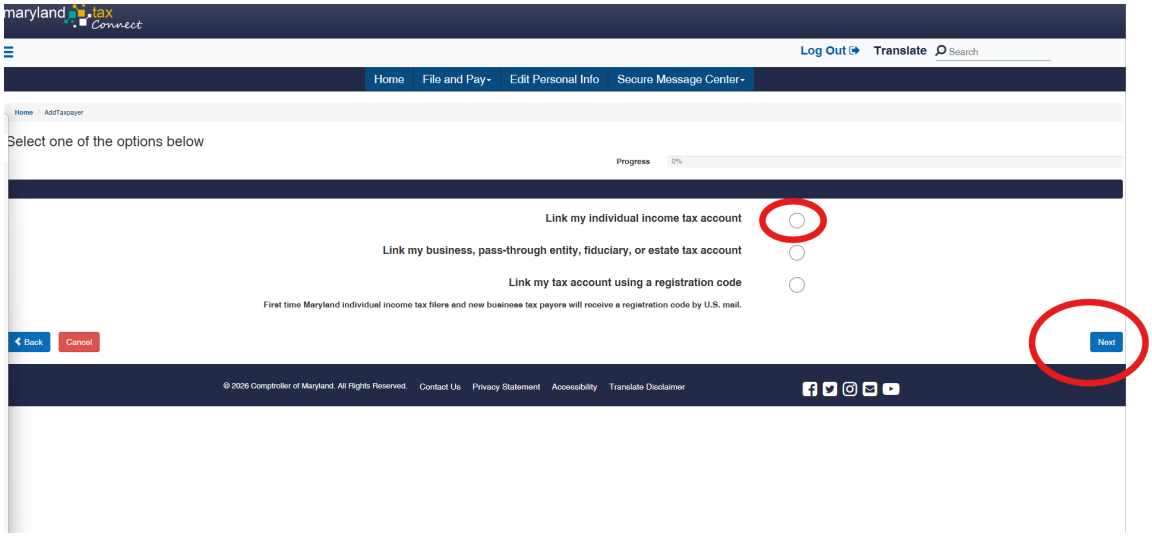

From the top menu, select Profile Information. From the drop-down menu, select Add a Tax Account.

Choose and Verify Your Individual Account

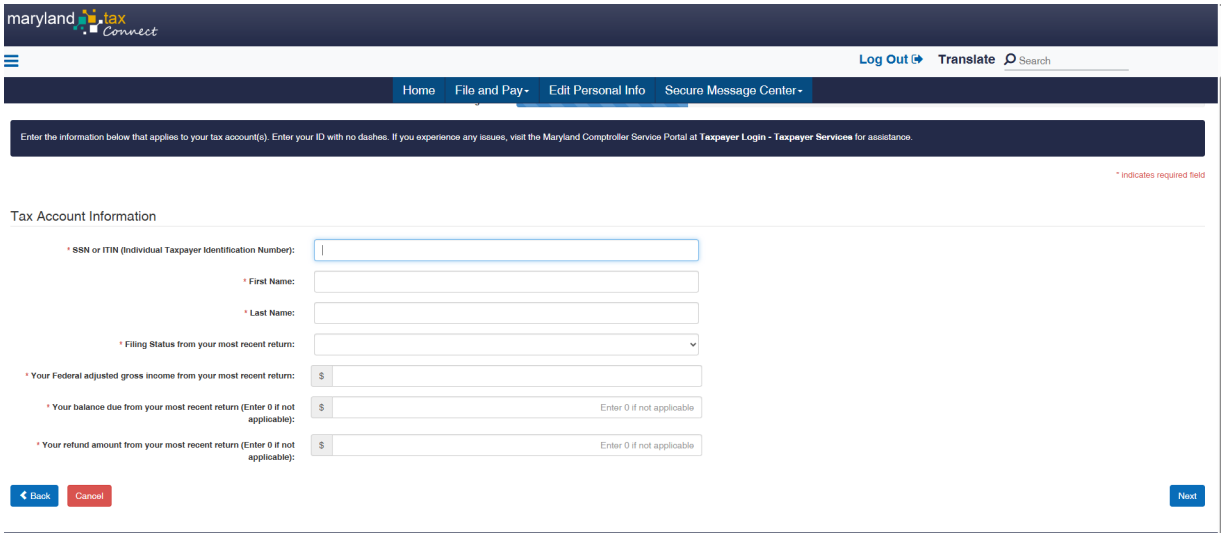

3 Choose the individual income tax option

Select Link my individual income tax account, and then select Next.

4 Enter your individual tax information

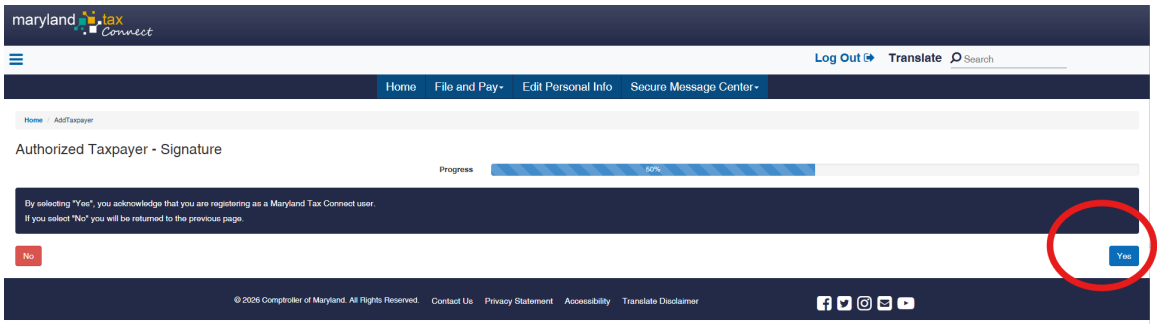

Complete the requested identity and Maryland tax-return information. Use information from a previously filed Maryland individual income tax return, then select Next.

Finish Linking Your Account

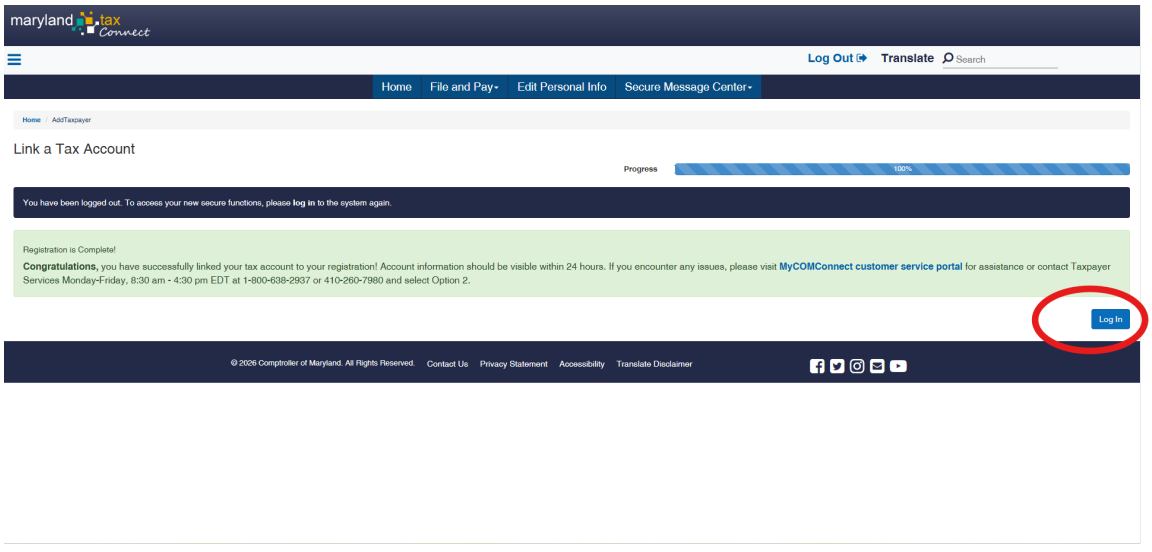

5 Confirm the Authorized Taxpayer Signature

Review the acknowledgment on the Authorized Taxpayer - Signature page. Confirm that you are authorized, then select Next.

6 Registration is complete

When the Registration Complete page appears, your individual income tax account is linked to your existing profile. Select Log In to return to your account.

Your Accounts Are Now in One Place

Your business and individual tax accounts remain separate tax accounts, but both are available through the same Maryland Tax Connect login.

Need our help?	You may grant P+G authorized-user access if you would like assistance with notices, payments, or other account matters.

Instructions:	Open Maryland's Adding an Authorized User Guide

Security reminder

Do not email passwords, temporary passwords, multifactor authentication codes, or complete tax-return information. Use a secure method when sharing sensitive information.
