*The Zookeeper's Wife is a strange, but historically true story of WWII. It reveals the extraordinary efforts of Jan and Antonina Zabinski, Christian zookeepers horrified by Nazi racism, who capitalized on the Nazis' obsession with pureblood animals in order to save over 300 doomed people by hiding them in the bombed-out cages at the Warsaw Zoo. A tale of people, animals, and subversive acts of compassion.*

*Credit for TRMC recertification with completed learning assessment. Approved for IIMC Credit, see registration for details.*
