Science Literacy for the Next Generation: K-6

Dr. Nancy Frey

author, professor

**Wednesday, April 18, 2018
5:00pm ET**

Are you pressed for classroom time and need to incorporate science into your reading instruction? Are you looking for strategies to help your students be successful in reading more complex texts and understanding content vocabulary? Dr. Nancy Frey will provide strategies on how to incorporate science into your reading block using instructional strategies that not only help students with close reading but also provide guidance in reading more complex science texts.

In this webinar, you will discover:

- What works in reading instruction
- Close reading with rich science texts
- The secret weapon in literacy instruction!
- How you can use these tools to motivate your students
