MANAGEMENT

LOBBY  
AMBASSADOR

### SECURITY SOLUTIONS

REEF Security Solutions deliver a superior workforce and advanced technology that are synonymous with safety, innovation, and value creation. Our flexible, cross-trained workforce includes security professionals, safety ambassadors, and concierges.

### THERMAL SCREENING

We offer thermal screening services for office employees and guests in building lobbies/entrances, run by our security team. If employee or guest has high temperature as detected by our thermal screening, we offer the option to visit one of our nearby mobile testing clinics.

### MOBILE TESTING CLINIC

Together with our healthcare partner, we offer COVID-19 testing. We provide the real estate with logistics staff and rapidly deployable, turnkey mobile testing clinics, while our partner provides the healthcare staff, patient portal for screening and scheduling, and FDA approved test kits.

### PACKAGE MANAGEMENT

Our on-site ambassadors will intercept and work to sanitize and deliver packages. They are trained on CDC guidelines, use protective gear, and contactless delivery service through our delivery portal. Our ambassadors are able to manage the entire mailroom process and offer REEF's locker system for parcel management.

### LOBBY AMBASSADOR

Lobby Ambassadors work to sanitize all touch points within the building lobby, including door handles, counters and elevator buttons. This process extends into the elevators, which are cleaned on a regular basis, and can include REEF Q to assist with managing inbound queuing and proper social distancing.

## EMERGING INTO A SAFE NEW WORLD
