

MOXA

EDS-2005-EL

Free Sample Offer

A Tiny but Mighty Ethernet Switch

As the manufacturing industry continues to evolve and improve, the requirements of network infrastructure constantly change when refurbishing or expanding facilities. When these changes take place, there are often space constraints for installing products in existing cabinets or machines.

To keep up with changing connectivity requirements while saving you time and effort, the EDS-2000-EL Series unmanaged switches include 5- and 8-port Ethernet options, with the 5-port model measuring almost as small as a credit card. Additionally, a robust design allows you to continue to meet your demands for flexibility, reliability, and continuity.

HOW TO QUALIFY:

- Must be an OEM with a \$10,000 or greater size project in order to qualify. Project needs to include EDS-2000-EL Series, but can also include other Moxa products. Project can take place up to two years from receiving sample unit. Applicants will be contacted by Moxa after submission of the request form.
- Available for US and Canadian customers only.
- Free Sample is for the EDS-2005-EL 5-port model only.
- This program is effective from February 1st – April 30th 2021.

HOW TO GET STARTED:

Complete the application form below and email to Nicole.Toepper@moxa.com. Free sample quantities are limited and will be distributed on a first come first serve basis. Samples are limited to one per organization.
