JASPER PARK GOLF CLUB

THURSDAY, MAY 30TH

1:00 PM

\$155 + TAX

Includes: Green Fees, Power Cart, Golf Gift, Voucher and Prizes

It took 50 teams of horses and 200 men working together for a year in order to clear the land of boulders and debris to prepare it for what would become one of Canada's premiere golf courses. Since the opening of the mountain golf course in 1925, this jewel set deep in the heart of the Canadian Rockies has been the setting of unforgettable memories for all of those who come to play.

Stanley Thompson, Canada's master golf course architect, displayed some of the finest work of his career with this design. The 18-hole layout offers elevated tee boxes, dramatic bunkering and holes aligned with distant mountain vistas. He built wide fairways that carve through thick forest, and maintained a partnership with the environment's natural contours, blending beautiful landscapes with challenging terrain. As a result, few golf courses in the world can match the rugged majesty of this national treasure.

Fairmont Jasper Park Lodge initiated a restoration project in 1994 to return this legendary Canada golf course back to its initial layout. Using Thompson's original blueprints from 1924, the main focus of the project was spent on restoring the bunkers and tee boxes in an effort to recreate the fundamental design. Highly acclaimed for its challenging layout and spectacular beauty, Jasper Park Lodge Golf Club is rated by SCOREGolf Magazine as the #1 Best Golf Resort in Canada. Most recently, although annually among the best Public Courses in Canada, in 2013, SCOREGolf Magazine rated Fairmont Jasper Park Lodge Golf Club the #1 Public course in Canada as well.

TRAINING DAY PRESENTERS

ARK TSISSEREV

Arkady Tsisseriev is the Senior Associate with the AES Engineering, electrical consulting company with offices in BC and Alberta. Before joining the world of the electrical consulting business in 2010, Ark was the Electrical Safety Regulator for more than 25 years. Since 1993 and until 2010 he has held the position of the Electrical Safety Manager, Chief Electrical Inspector & City Electrician for the City of Vancouver. Before moving to the City of Vancouver in 1993, he was Head of Electrical Section for the City of Winnipeg Inspections Department since 1984. Ark has written and published many articles, course notes, and taught various CE Code and fire alarm and emergency system courses at the University(s) of B.C., BCIT; University of Manitoba and via other venues. Ark writes by-monthly columns for the "International Association of Electrical Inspectors News" and for "Electrical Line" journals. Ark is an active member of many industry associations and is involved in numerous technical committees with such organizations as CSA, NFPA, IEEE, ULC, SCC, SFPE and IEC. Mr. Tsisseriev was for many years chairing the BC Electrical Code Adoption Committee. Ark is the Immediate Past Chair of the CSA Technical Committee for the development of the CE Code and of the CSA Strategic Steering Committee for the Requirements of Electrical Safety. He also actively participates in the ULC Technical Committee for the development of ULC S500 series standards. Ark represents the CSA on the NEC Technical Committee, and he chairs the Canadian National Committee on the IEC TC 64. Ark started his work in the electrical industry in 1962 as a construction electrician. Ark is a certified electrical inspector in the Province of BC and a member of various provincial engineering associations in Canada. He has obtained his undergraduate and PhD Degrees in Electrical Engineering from the State University in Ukraine in 1972 and Master's Degree in Electrical Engineering from the University of Manitoba in 1984.

Correlation between the Canadian Electrical Code and the National Building Code regarding application and installation of the electrically connected life safety systems.

This presentation covers provisions of the CE code, Building Code, relevant CSA, NFPA and ULC standards for application and installation electrically connected life and fire safety equipment such as fire alarm systems, emergency generators, fire pumps, sprinkler systems including heat tracing equipment, transfer switches, smoke alarms, exit signs, emergency lighting, electromagnetic locks, hold open devices, elevators and protection of conductors supplying this equipment against exposure to fire. **Why this subject is presented:** To assist members of the ECAA in a consistent application of the CE code requirements and the CE code references to the NBC and to the relevant installation standards on this subject.

Specific aspects of learning outcome: Understanding impact of building classification on application and installation of electrically connected life safety systems. Building code requirements for hold open devices and electromagnetic locks: what, why and how; Criteria for installation of fire alarm system in a building; Electrical supervision of fire alarm system; Signals to fire department; Sprinkler system and heat tracing cables – electrical supervision and fire alarm zoning requirements; Audible and visual signal devices; Smoke and heat detectors; Smoke alarms; Life safety systems in high buildings; Smoke control and smoke venting equipment; Emergency lighting and exit signs; Fire pumps – the NBCC, NFPA 20 and the CE Code requirements; Emergency generators; Automatic transfer switches; Protection of electrical conductors against exposure to fire; Automatic elevator emergency recall; Commissioning on integrated life safety systems. ULC S524 – installation criteria for fire alarm system components; The CE Code and electrically connected life safety systems. Checklist for electrical designers.

TRAINING DAY PRESENTERS

RENE LEDUC

President of MAREX Canada Limited, a consulting and inspection company specializing in 'hazardous locations', electrical Safety Codes construction inspection and compliance monitoring, and electrical regulatory management. 21 years service with the Alberta Government; 9 years as the Technical Administrator/Chief Inspector for the electrical discipline at Alberta Municipal Affairs. Responsibilities include: Participation on local, national, and international Codes and standards development forums; Technical and legislative policy development; Establishing and maintaining close working relationships with industry. Other responsibilities with Municipal Affairs include program administration, special projects, inspections, and training. Experience includes 16 years in electrical construction/maintenance and 2 years in the field of Earth Resources (coal) exploration and technology.

Impedance Grounding Systems

A look at where and why impedance grounded systems are used, their benefits and their limitations. A review of the 2018 Code requirements and some of the proposed changes we're looking at for 2021.

JOHN KNOLL, PEC

John Knoll has 14 years experience in construction and 12 years experience in the electrical, security, audio visual, and home automation fields. John incorporated JLE Electrical Ltd. in 2010 and successfully sold the business in 2017. He is a past president of the ECAA Edmonton Chapter, CEDIA Awards judge and an enthusiast of home automation, technology, and sound systems.

Smart Home Wiring

- 1) Organization and record keeping: The importance of documenting all the small things.
- 2) Remote Management Solutions: Ways to avoid dispatching vehicles for service calls that can be done remotely.
- 3) Continuing Education: Technology is ever changing. Keep up or get out.
- 4) Patience and Problem Solving Skills: Nothing goes correct the first time. (Without the above this session is not for you)
- 5) Networking Equipment and Overview: What makes up a network? The difference between an external and internal IP address and more.
- 6) Lighting Control Overview: Lighting is the core to a well automated house. What are your options.
- 7) Audio Visual Overview: Next is music.
- 8) Security Overview: An overview of security sensors. How they can be utilized to create an intelligent home.
- 9) Home Theater Overview: The basics of a home theater.

TRAINING DAY PRESENTERS

JOE DAVIS

Joe has been working in the fire and life safety industry for 18 years his industry experience includes sales, business development and time as a certified fire alarm technician in the field. Joe is on the ECAA Provincial Board and represents the ECAA on the Fire Sub Council. Joe was also the President of the Canadian Fire Alarm Association Alberta Chapter for the last 2 years and now sits on their board as the past President. Joe is currently a Business Development Manager with Johnson Controls for central Canada on their Connected Technologies team.

Fire Alarms & Other Systems in Smart Buildings

There is a growing trend in construction driven by the Internet Of Things (IOT), smart building and integrated systems. In 2018 there was \$28 billion spent in North America on building smart buildings and this number is projected to grow to \$45 billion by the end of 2020. I will be talking about some of the innovations and trends we are seeing in this market and how and why they are being implemented. Don't get left behind. Join me in learning about the future of construction.

GRANT AINSLEY

Grant Ainsley is a former award-winning journalist and public relations professional who now works with politicians, business executives, association leaders and others to help them refine their messages to the public. He has spoken across the country about the news media, spending much of his time conducting media training sessions for organizations. He also does workshops for executives to improve their communication skills. He's the author of the book The Honest Spin Doctor about media relations.

Surviving a Social Media Meltdown

Hardly a week goes by where there isn't some sort of an embarrassing social media event that goes viral and the entire country hears about it. It's easy to see why. There's never been a time that organizations are in greater danger of having something go wrong and having their brand damaged so badly it'll take years to recover.

Despite that, too few leaders seem to be concerned about the dangers lurking in the social media use of their employees. The majority of companies don't have a written policy to deal with social media, even though statistics show around 70% of their employees are on at least one social media site every day.

Grant Ainsley is one of Canada's top media trainers and a former award-winning journalist and public relations professional. His presentation will not only inform, but also entertain you.

It will result in organizations understanding the risks they face and how to minimize them. Not only will stress be reduced and embarrassment prevented, but big dollars can be saved.

Surviving a Social Media Meltdown will show you:

Why we live in dangerous times – a look at some social media meltdown case studies. How to put policies in place to lessen the chances of it happening to you. Ways to handle difficult situations in the media if you become embroiled in a social media meltdown

TRAINING DAY PRESENTERS

ROB FEAGAN

Robert Feagan has held his position as Executive Director of Occupational Health and Safety Delivery with Labour for five years. Prior to assuming this position he served as the Director of Partnerships in Injury Reduction since 1997. Born in the Northwest Territories and educated at Dalhousie University in Halifax, Nova Scotia, Robert held various senior positions with the Government of the Northwest Territories prior to joining the Government of Alberta. He has extensive experience in negotiating unique partnership agreements with aboriginal organizations, various industry sectors, and local, as well as provincial government. Robert is a published author who enjoys a variety of activities in his spare time.

An Update on Bill 30.

An Act to help protect the health and well being of working Albertans.

JASON BURKE

Jason is a telecommunications professional with 25+ years' industry experience including distribution sales, vendor sales and as a contractor. BICSI RCDD accreditation received in 2003. Support Apprenticeship and Industry training through LAC and PAC board positions. Jason is on ECAA Board of Directors as Data Communications Chairperson. Currently President of Unified Systems Group.

LARRY CANTELO, PEC

Larry started his electrical apprenticeship in 1974. Following 27 years in industry, including a short stint as an electrical Safety Codes Officer (SCO), he began working at NAIT as an electrical apprenticeship instructor where he worked for 12 years. He also taught in the alternative energy program during his last year at NAIT. Since 2013 Larry has worked part-time as an instructor and curriculum developer for the ECAA, IBEW and Safety Codes Council among others. He is a Professional Electrical Contractor (PEC); Red Seal and Master Electrician, Groups A and B Electrical SCO and has a degree in adult education.

Low-voltage Installations and the Canadian Electrical Code

There are now dozens of POE systems being installed regularly throughout offices and facilities on every project. Currently many of these devices operate up to 100W per port. These systems (except for lighting) do not require an electrical permit.

As these systems approach the limits of Class 2 cabling we see changes to the CEC, (see section 16-330). The way we install Category cabling requires attention, also noted in the 2018 Code Book. What does it all mean to our industry?

In this open-mike forum low voltage contractor Jason Burke and Electrical SCO Larry Cantelo will attempt to clarify the permitting requirements as well as have an open discussion about these installations.

TRAINING DAY PRESENTERS

ROBERT (BOB) JOSEPH, P.Eng, LL.B

Bob Joseph is a partner at Prowse Chowne and carries on a litigation practice with a focus on construction litigation, including builders' liens, contract disputes and business litigation including shareholder disputes. He also handles various tort claims. He completed his articles at a large Edmonton firm and was called to the Alberta Bar in 2006. Bob is a professional Engineer with 6 years' experience in engineering design, construction, project management, modeling and planning and field operations. He instructed Contract Law and Construction Documents course at the University of Alberta for 4 years, which is a core course for the Construction Administration Certificate. He has also been a guest presenter at the Faculty of Engineering. Bob's professional affiliations include membership in the Canadian Bar Association (CBA) and the Association of Professional Engineers and Geoscientists of Alberta (APEGA). Bob was the co-chair of the Northern Alberta CBA Construction section for eight years. Bob was recently inducted into the Construction Lawyers Society of America.

Contract Law & Construction Documents

Bob will be speaking on Contract Law and Construction Documents. The talk will be an introductory foray into several construction type topics including but not limited to:

- Contracting with other parties
- The Court process
- Builders' Liens
- Construction Bonding
- Bidding and Tendering Issues
- Delay and Impact claims

TERRY BECKER, P. ENG, CEMCP

Terry Becker, P.Eng., CEMCP, is the senior vice president of Danatec Educational Services Ltd.'s Electrical Safety Division, a total solutions provider for electrical safety consulting services, licensed Electrical Safety Programs, Electrical Safety Audits, Arc Flash Studies and arc flash and shock training, based out of Calgary, Alberta, Canada. Terry has over 25 years of experience as an Electrical Engineer working in both engineering consulting and for large industrial oil & gas corporations. Terry is also the first past Vice-Chair of the CSA Z462 Workplace Electrical Safety Standard Technical Committee, and currently an Executive Committee member, voting member and leader of Working Group 8 Annexes as well as a member of the IEEE 1584 Committee, the CSA Z463 Guideline for Electrical Equipment Maintenance Standard Committee, and a member of the NFPA 70E Annexes Working Group. Terry is a Professional Engineer in the Provinces of Alberta, British Columbia, Saskatchewan and Ontario, and regularly presents on CSA Z462, NFPA 70E and electrical safety principles at industry conferences and workshops both nationally and internationally.

Misconceptions About Performing Live Work

We will process mock Work Order Exercises of field based energized electrical works tasks commonly performed by Qualified Electrical Workers. Application of the CSA Z462 Workplace Electrical Safety Standard and the requirements of a documented Electrical Safety Program.

TRAINING DAY PRESENTERS

DONNA BERNARD

Donna has found a way of combining her passion for Human Resources and post-secondary education and has a strong commitment to the development of others. As Chair of Academic Programming for Aurora College Inuvik NWT, she returned to Edmonton, in April 2011 to work in Fort McMurray as Director of HR in the Mining Industry and later in Camp accommodations as well as a year of curriculum development for Portage College. Prior to heading for Inuvik NWT, Donna was employed by NAIT and later Grant MacEwan College as Program Consultant.

Donna considers herself to be a lifelong learner; holding a Bachelor of Education degree from University of Alberta - Adult Education, Minor - Business; a Bachelor of General Studies HR focus from Athabasca University; Certificate in Adult and Continuing Education from University of Alberta, two Journey Trade Certifications Hairstyling and Barbering, as well she is a Certified Life Skills Coach, Grant MacEwan University.

Progressive Discipline Objectives

In this training you will learn the most effective methods to handle Progressive Disciplines, and what actions you should take as a supervisor.

- To understand the appropriate time and ways to use a Progressive Discipline.
- To learn the types of corrective and disciplinary actions available to supervisors.
- To understand the supervisor's responsibilities, during the corrective process.

LOU HIEMER, P.ENG; PEC

Lou Hiemer is an Electrical Engineer, Electronics Technologist, Professional Electrical Contractor and Master Electrician with specialized practice in the following industries: Saw Mills; Oil & Gas Processing; Steel Mills; Mines; Level 3 & 4 Bio Safety Laboratories; Nano Technology Laboratories; Co-Generation; Energy Procurement. Experienced in Forensic Engineering, Construction – Operations & Maintenance, Commissioning/Verification, Commercialization of Research & Development, Design, Development & Implementation. Lou Hiemer sits on the ECAA Board of Directors as Chair of the Green Initiatives Committees.

How to integrate green initiatives within the context of the Electrical Industry.

This session will cover:

1. Method of Installation (CEC)
2. Energy Density & Standards of Energy Consumption
3. Types of contracts available & initiative specific to the contracts. (Energy Performance Contracts (EPC's))
4. How do you finance it?
5. How do you substantiate. (Post construction substantiation/qualification)

KEYNOTE SPEAKER

JD DOLAN

John "JD" F. Dolan II is a Principal and Co-Founder of LDR where he leads the innovation infrastructure building executive initiatives, namely supporting the establishment of corporate innovation labs, cross organizational collaboration teams, and disruptive venture capital exploration. As a former

US Special Operations Strike Force Commander, JD has led initiatives to introduce US Special Operations methodologies in innovation, problem solving, and leadership, to organizations- from startups to multi-billion dollar enterprises. JD earned a BA from Dickinson College and an MBA from Columbia University Business School. He is a published author, co-authoring "The Soldier's Financial Leadership Guide" (published by LDR- July 2012), and his passions include family, fitness, and furthering his support for American veterans organizations including work with Operation Pay It Forward and Field of Dreams.

DAVE TAYLOR

Dave Taylor is the Director of Leadership for LDR. Prior to joining LDR, Dave retired from the US Army after 24yrs of service where most of his time was spent within the U.S. Special Operations Forces in the 75th Ranger Regiment the Joint Special Command. Ranger

Strike Force Commander leading teams from 200 - 1,200 across eight combat deployments. Dave also led a team of 650 while serving in The Old Guard, whose responsibility it is to lay our nations fallen to rest in Arlington National Cemetery. He also served in the Pentagon where he routinely engaged with our nation's most senior military and civilian leadership. Dave earned a BS from West Virginia University and his passions include mountaineering, fitness, his family, helping others, and is involved in veteran's organizations Team Rubicon and Objective Zero.

SPOUSAL EVENT

Join Karen Tarita for a morning of creativity! Choose between building one of the following two projects:

BIRD HOUSE. The Importance of Bird Houses. ... Bird Houses are often called nesting boxes because they provide a safe place for birds to build their nests, protected from the elements and predators. In the winter months, they give visiting birds a place to snuggle together for warmth away from the cold air. Controlling pests.

BAT HOUSE. As more wild habitat gets developed by humans, bats and other wild creatures lose their natural nesting places. Bats play a vital role in natural pest control by reducing the mosquito populations, so it's in our best interests to protect them and encourage them to nest in our yards and gardens by installing bat houses.

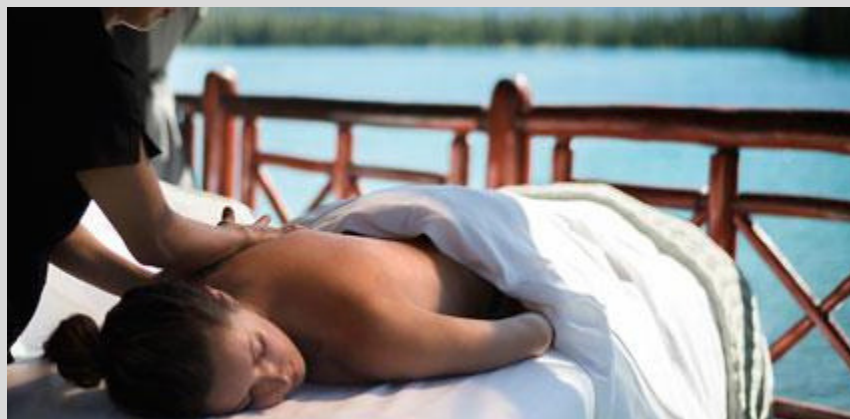

Details to come!

THE SPA & SALON AT JASPER PARK LODGE

The grandeur of Jasper does more than simply take your breath away: It inspires you to slow your pace. To breathe deeply. To reflect on the amazing artistry of nature. This reflection underscores every treatment and experience offered at The Spa at Fairmont Jasper Park Lodge.

The spa experiences allow guests to participate in nature's gifts in the heart of Jasper National Park. We offer customized treatments to help you recover from long days on the golf course or the mountain trails. Whichever treatments you choose, The Spa at Fairmont Jasper Park Lodge ensures an experience unlike any other—one that gives you the time and space you need to breathe, dream and reflect on the natural abundance that surrounds you.

ECAA

Electrical Contractors
Association of Alberta

OPTIONAL ACTIVITIES - FRIDAY, MAY 31ST

AMAZING RACE

\$50/PERSON

9:00 AM - 11:00 AM

The Amazing Race activity has teams of 2-4 people racing against each other to find clues and complete challenges around the Jasper Park Lodge property. Teams will find themselves solving puzzles, searching for trivia answers, competing in physical challenges, and finding their way around the property. The first team to successfully complete the Jasper Park Lodge Amazing Race will be crowned the winners!

HORSE BACK RIDING

\$47/PERSON

1:00 PM (1HR 15MIN)

Cowboy Up! For a genuine Western experience, enjoy the wilderness of Jasper from your saddle. There is a good chance you'll see and elk or a bear, as you ride along Lake Annette and catch a glimpse of Lake Edith and Lake Trefoil. This is a great family ride. 6 years of age and up. Approximately 6 km.
